1. Statement of 2024 Internal Control System

#### I. Letter to Shareholders

Greetings to all shareholders, ladies and gentlemen!

We would like to express our gratitude to our shareholders for their support over the past year, and we appreciate you sparing time from your schedules for attending the 2025 Regular Shareholders' Meeting of the Company.

In 2024, the global economy was affected by geopolitical tensions between the Middle East and Russia and Ukraine, rising inflation, rising logistics costs, and the continuous decline in the Japanese yen exchange rate. In recent years, the manufacturing capacity of China's machine tool industry has been improved, and the low-price product strategy has been adopted. The high and low-end markets in Japan and mainland China are squeezed. Taiwan's machine tool competitive advantage of high-cost performance in the past is gradually lost. In 2024, Taiwan's annual machine tool export value will decrease by 14.8% compared with the previous year.

However, the Company has already optimized its global layout and diversified its operating risks in advance, and its operating scope has been extended to the aerospace, hydrogen fuel cell, semiconductor and medical equipment industries. The Company is also seeking strategic partners to actively develop its business territory and focus on high-tech and continuously high-growth markets. In addition to hardware equipment development, we continue to develop software configuration to complete Mr.Q, an embedded intelligent system with sound and touch controls, to help shorten customer downtime and develop a machine carbon emission calculation system to meet the challenges of smart machinery and sustainable development. This has enabled the Company to continue to grow steadily despite the decline in the machine tool industry in recent years. In addition, the Company has continued to implement the concept of sustainable development, improve the working environment and talent retention policy, and ensure the stability of human resources, so that the Company can still maintain its competitiveness in the face of external economic fluctuations.

In a dynamic environment with many unfavorable factors, with the efforts of all employees, the Company committed to improving efficiency, saving costs, and strengthening the Company's competitiveness to respond to market changes. In 2024, the revenue and profit growth achieved good results in adversity, and the performance was better than the industry average. Here, on behalf of the Board of Directors of Quaser Machine Tools, Inc., I would like to thank all shareholders for their support. The Company's 2024 business overview and 2025 business plans are briefed as follows.

#### 1. Business Report of 2024

#### (1) Operating Performance

Hnit.	NT\$/ Thousand	
	IN L.M. I HOUSAHU	

Items	2024	2023	Growth Rate (%)
Consolidated Operating Revenue	3,240,019	2,770,750	17
Consolidated Gross Profit	1,032,264	776,670	33
Consolidated Operating Income	339,854	209,088	63
Consolidated Profit after Income Tax	212,592	110,993	92
Basic Earnings per Share	3.87	2.02	92

Description:

In 2024, the net consolidated operating revenue was NT\$3.24 billion, increased by 17% compared to NT\$2.77 billion in 2023. The gross profit margin increased to 32% in 2024. In addition to benefiting from the rising foreign exchange rates, the Company's gross profit margin reached a historical high since the Company's OTC listing through increased added value, optimization of sales mix and cost control. The Company continues to control costs and maintain an appropriate operating expense

ratio. The consolidated operating profit in 2024 was NT\$340 million, with an operating profit margin of 11%. The consolidated net profit after tax was NT\$210 million, with a net profit margin of 7%, an increase of 92% from 2023.

#### (2) Comparison of 2024 and 2023 Profitability:

Items	2024	2023
Ratio of Operating Income to Paid-in Capital (%)	61.85	38.05
Ratio of Pre-Tax Income to Paid-in Capital (%)	57.74	33.59
Profit Ratio (%)	6.56	4.01
Earnings per Share (NT\$)	3.87	2.02

#### (3) R&D Status:

In 2024, the Company's R&D expenditure accounted for 4% of its operating revenue. The Company continues to develop forward-looking technologies and customized models to enhance product value and deepen the market awareness of new brand concepts and applies the ESG carbon reduction concept to newly developed machine products. The newly developed laser equipment machine completed in 2024 has a machine width ranging from 600 mm to 1 meter, which reduces the size of the machine and reduces the carbon emissions generated by the process and transportation. It can be used in the medical, semiconductor, aerospace and hydrogen fuel energy industries.

#### 2. Operation Plans for 2025

Quaser serves as a foundry for globally renowned brands and actively evolves the own brand of Quaser/Winbro with its development strategy which attach equal attention to OEM/ODM and own brand, developing an innovative environment and exploring the opportunities for gaining new growth momentum.

#### (1) Production and Marketing Strategies

- 1. Independent R&D and production: Focus on the research, design and manufacturing of linear motors and built-in spindles, providing customers with stable and high-quality upgrade solutions.
- 2. Investment in smart technology: Continue to increase the research and development of smart machinery to solve the problem of labor shortage in the industry and improve production efficiency.
- 3. Adapt to local conditions: Flexibly develop diversified product portfolios and sales strategies based on different market demands strategies to meet the specific needs of customers in each region.
- 4. Establishment of regional technology centers: Establish regional technology application centers to provide more efficient and closer circular after-sales services for local markets and industry types.
- 5. Strengthen sales and customer connections: Optimize sales channels, directly target end customers, strengthen customer relationship management, and thereby increase product unit sales value.

#### (2) Resource Integration

- 1. Internal resource integration: In the fields of Sales, R&D, Manufacturing and Management, we will fully integrate the advantages of each company within the group to give full play to the comprehensive benefits and enhance competitiveness.
- 2. External strategic cooperation: Facing the rapid changes in the global machine tool industry environment, it is no longer possible to fight alone. The company will actively promote upstream and downstream integration, work with strategic

partners, jointly expand the business territory, and achieve sustainable growth momentum.

#### 3. Future Development Strategies of the Company

The Company continues to invest in the development of smart machinery and accelerate its global layout to seize business opportunities in supply chain restructuring. From product development, mass production to after-sales service, we implement the concept of carbon reduction in every link and strive to promote green manufacturing and improve energy efficiency.

As hydrogen energy is regarded as the core direction of future energy transformation, fuel cell vehicles, hydrogen power stations and the growing demand for energy storage systems will drive the demand for high-performance machine tools. Combining cutting-edge technology development with industry chain cooperation will become one of the company's important strategies for future development, helping companies seize more opportunities in emerging markets.

### 4. Impact of External Competitive Environment, Regulatory Environment, and Overall Operating Environment

Mainland China has terminated the tariff preferences on machine tools in ECFA in 2024, resulting in a significant increase in the cost of Taiwan's exports to mainland China. At the same time, China has been expanding its international market share with a low-price product strategy, making it extremely challenging for Taiwanese companies to compete with low-price equipment. In addition, the sharp depreciation of the Japanese yen and the Korean won in recent years has further weakened the competitiveness of Taiwan's high-end machine tool products in the international market. Against the backdrop of global economic uncertainty, heightened geopolitical tensions, and economic slowdowns in the Eurozone and Germany, Taiwan's machine tool industry is facing increasingly severe challenges. However, in recent years, the company has actively developed smart machinery and expanded the hydrogen fuel cell industry, strengthened the layout of production bases, and made advance deployments to respond to various market changes, further enhance its resilience and competitiveness, and ensure the company's sustainable operation and stable growth.

Note 1: The General Manager of Quaser Machine Tools, Inc. is also the person-in-charge of Quaser Europe Technical Center AG, which is 100% invested by the Company, along with Quaser America Machine Tools, Inc., Winbro Group UK Limited, Winbro Group Technologies Limited and Winbro

Note 2: The Chairman of the Company, Mr. Shieh, Raui-Mu, and the General Manager, Mr. Hsieh, Tien-Hsin, are first degree relatives. Mr. Hsieh, Tien-Hsin, in addition to his many years of working experience in the Quaser Group, was also involved in the technical department and the execution of overseas business, and is familiar with the operation of the Company. Therefore, the Board of Directors has approved his appointment to the position of General Manager. However, in order to implement corporate governance, the Company has increased the number of independent directors in excess of the statutory requirement and nominated more than half of the directors who are not concurrently employees or managers, etc., so as to enhance the functions of the Board of Directors and strengthen the supervisory function.

Note 3: The Company elected a new board of directors at the shareholders' meeting on May 31, 2024, and the term of the independent director ended on the same day, resulting in their removal. Note 4: The Company elected a new board of directors at the shareholders' meeting on May 31, 2024, and they are the newly appointed independent directors.

Note 1: Professional qualifications and experience: Describe the professional qualifications and experience of individual Directors and Supervisors.

If they are members of the Audit Committee with accounting or financial expertise, their accounting or financial backgrounds and work experience should be described, and it should also be stated whether or not they have not been subject to any of the circumstance set forth in Article 30 of the Companies Act.

Note 2: Independent Directors shall describe the circumstances under which they meet the independence requirements, including but not limited to whether they, their spouses, relatives within the second degree of kinship, etc., are directors, supervisors or employees of the Company or its affiliates; the number and proportion of shares of the Company held by themselves, their spouses, relatives within the second degree of kinship, etc., or those under nominee arrangements; whether they are directors, supervisors or employees of a company that has a specific relationship with the Company (refer to Article 3, Paragraph 1, Subparagraphs 5 to 8 of the Regulations Governing Appointment of Independent Directors and Compliance Matters for Public Companies); and the amount of remuneration received during the last two years for services rendered to the Company or its affiliates in business, legal, financial, accounting and other areas.

Note 3: The Company elected a new board of directors at the shareholders' meeting on May 31, 2024, and the term of the independent director ended on the same day, resulting in their removal.

Note 4: The Company elected a new board of directors at the shareholders' meeting on May 31, 2024, and they are the newly appointed independent directors.

#### 5. The Professionalism, Diversification and Independence of the Board of Directors

#### (1) The Professionalism of the Board of Directors:

The Company adopts the candidate nomination system in accordance with the Company's Articles of Incorporation to evaluate each candidate's academic qualifications, professional background, integrity or relevant professional qualifications, etc., and submits them to the shareholders' meeting for election upon the resolution of the Board of Directors. Pursuant to Article 20, Paragraph 4 of the "Corporate Governance Best Practice Principle" of the Company, members of the Board of Directors shall generally possess the knowledge, skills and qualifications necessary in performing their duties. In order to achieve the Company's desired corporate governance goals, the Board of Directors as a whole shall be equipped with the following capabilities:

- A. Business judgment
- B. Accounting and financial analysis
- C. Business management
- D. Crisis management
- E. Industrial knowledge
- F. Global market perception
- G. Leadership
- H. Decision-making

#### (2) The Diversification of the Board of Directors:

As part of the Company's policy to diversify its Board of Directors, strengthen corporate governance, and promote the development of a sound composition and structure of the Board, the diversity policy under Article 20, Paragraph 3 of the Company's "Corporate Governance Best Practice Principle" indicates that the Company's diversification goal is to have at least one female Board member and no more than one-third of the members are employees of the Company. In line with the global trend toward gender equality, the company is committed to promoting gender balance in its board of directors and plans to increase the number of female board members in the future.

Currently, there are nine Board members, and the implementation of diversity among all Board members is as follows:

- The percentage of female directors is 11% while the percentage of male directors is 89%.
- Among the directors, four are aged 71 or above, one is aged 61 to 70, two are aged 51 to 60, and two are aged below 50.

• The core items of diversity for each director are as follows:

Con	Core Items of Diversity			position		Ir	ndustry E	Experien	œ	F	rofessio	nal Abili	ty	Terms	of Office
Name of Director		Nationality	Gender	Age	Employee Of the Company	Business Development	Management Capabilities	Leadership and Decision-making	Global Market Perception	Business Affairs	Legal Affairs	Finance Accounting	Risk Management	Lesserthan 3 Years	3~9 Years
Director	Shieh, Raui-Mu	Republic of China	Male	71~80	Chairman of the Company	V	V	V	V	V			V		
Director	Hsia, Ching- Hsuan	Republic of China	Female	41~50	Nil	V	V	V	V	V			V		
Director	Lai, Yung-Hsiang	Republic of China	Male	51~60	Nil	V	V	V	V	V			V		
Director	Wang, Tai- Kuang	Republic of China	Male	71~80	Nil	V	V	V	V	V			V		
Director	Chen, Chun-Ya	Republic of China	Male	61~70	Nil	V	V	V	V	V			V		
Independent Director	Chen, Hsin-Liang	Republic of China	Male	71~80	Nil	V	V	V	V	V	V		V		V
Independent Director	Lin, Chang-Chih	Republic of China	Male	41~50	Nil	V	V	V	V	V			V		V
Independent Director	Chen, Run-Qing	Republic of China	Male	71~80	Nil	V	V	V	V	V		V	V	V	_
Independent Director	Lin, Feng-Zhih	Republic of China	Male	51~60	Nil	V	V	V	V	V			V	V	

- If the representation of either gender on the company's board of directors is less than one-third, the Company will explain the reasons and outline the measures planned to enhance gender diversity on the board.
  - A. Reason for the situation: The Company has a board of 9 directors, as established in its Articles of Incorporation. The current board was elected at the shareholders' meeting on May 31, 2024. However, there is only one female director, which, while in compliance with the relevant regulations at the time, does not meet the one-third gender representation requirement. This is primarily due to the nature of the industry, where finding suitable talent in a short period is challenging.
  - B. Measures to be taken: Prior to the next board election, the Company will actively seek recommendations for potential candidates through various channels, including industry networks and academic institutions, in order to enhance corporate governance and promote board diversity.

#### (3) Board Independence:

The current Board of Directors of the Company consists of nine Directors, including four Independent Directors, accounting for 44% of the total number of Directors. the four Independent Directors are in compliance with the regulations of the Securities and Futures Bureau, Financial Supervisory Commission regarding Independent Directors, and there are no violations of Article 26-3, Paragraphs 3 and 4, of the Securities and Exchange Act among the Directors and the Independent Directors.

Note 1: Those who are not at the Assistant Manager level or above, or Supervisors/Unit Supervisors who are not appointed by the Board of Directors in accordance with the law, or those whose positions are concurrently held by officers not at the Assistant Manager level or above, are not disclosed.

Note 2: The Chairman of the Company, Mr. Shieh, Raui-Mu, and the General Manager, Mr. Hsieh, Tien-Hsin, are first degree relatives. Mr. Hsieh, Tien-Hsin, in addition to his many years of working experience in the Quaser Group, was also involved in the technical department and the execution of overseas business, and is familiar with the operation of the Company. Therefore, the Board of Directors has approved his appointment to the position of General Manager.

However, in order to implement corporate governance, the Company has increased the number of independent directors in excess of the statutory requirement and nominated more than half of the directors who are not concurrently employees or managers, etc., so as to enhance the functions of the Board of Directors and strengthen the supervisory function.

Note 3: Retired and resigned from the position of Deputy General Manager on February 28, 2025.

Describe the payment policy, system, standard and structure of remuneration for Directors and independent Directors of the Company, and the relevance of duty, risk, the time spent and other factors to be considered in the amount of remuneration:
 In accordance with Article 30-3 of the Company's Articles of Incorporation, the amount of Directors' remuneration is determined by reference to the value of the Directors' contributions to the Company, the Company, specially performance, and the domestic and foreign standare muneration.

<sup>2.</sup> In addition to the above table, the remuneration received by the Directors of the Company for services rendered to all the companies included in the financial statements (e.g. acting as consultants while not being employees, etc.) for the most recent year: None.

<sup>3.</sup> The amount of directors' remuneration to be paid in 2024 is based on estimates. The actual amount of directors' remuneration to be paid individually will be subject to the resolution approved by the Board of Directors of the Company.

<sup>4.</sup> The Company elected a new board of directors at the shareholders' meeting on May 31, 2024, and the term of the independent director ended on the same day, resulting in their removal.

The Company elected a new board of directors at the shareholders' meeting on May 31, 2024, and they are the newly appointed independent directors.

Note 1: The amount of employees' remuneration to be paid in 2024 is based on estimates. The actual amount of employees' remuneration to be paid individually will be subject to the resolution approved by the Board of Directors of the Company.

Note 2: Retired and resigned from the position of Deputy General Manager on February 28, 2025.

#### (4) Managers with Employee Remuneration Distribution

December 31, 2024; Unit: NT\$ thousand; %

	Title	Name	Stock Bonus	Cash Bonus	Total	Ratio of Total Amount to Net Income (%)
	General Manager	Hsieh, Tien- Hsin				
	Deputy General Manager (Note 3)	Chuang, Yung- Huang				
Manag	Deputy General Manager	Huang, Kuo-Chin	-	596	596	0.28%
ers	Assistant Manager of R&D Department	Hung, Ming-Hung				
	Assistant Manager of	Lin, Yu-				
	Management Department	Hsin				
	Audit Supervisor	Chan, Hui- Yen				

Note 1: Those who are not at the Assistant Manager level or above, or Supervisors/Unit Supervisors who are not appointed by the Board of Directors in accordance with the law, or those whose positions are concurrently held by officers not at the Assistant Manager level or above, are not disclosed.

Note 2: The amount of employees' remuneration to be paid in 2024 is based on estimates. The actual amount of employees' remuneration to be paid individually will be subject to the resolution approved by the Board of Directors of the Company.

Note 3: Retired and resigned from the position of Deputy General Manager on February 28, 2025.

- (5) Compare and describe the analysis of the total remuneration paid to the Company's Directors, General Managers and Deputy General Managers as a percentage of net income after tax for the most recent two years for the Company and all companies within the consolidated statements, either individually or as part of their respective financial statements, and describe the policies, standards, and packages for such remuneration, the procedures for setting such remuneration, and the relationship to operating performance and future risks:
  - 1. Analysis of Total Remuneration Paid to the Company's Directors, General Manager and Deputy General Manager as a Percentage of Net Income After Tax for the Last Two Years for Individual or Respective Financial Statements:

Year	20	24	20	23
	Ratio to After-tax	Net Income (%)	Ratio to After-tax	Net Income (%)
Title	The Company	All Companies within the Consolidated Financial Statements	The Company	All Companies within the Consolidated Financial Statements
Director	5.71	5.71	4.94	4.94
General Manager and Deputy General Manager	4.45	5.40	9.20	9.67

- Note 1: Since the Company has established an Audit Committee, the disclosure of the Supervisor's remuneration is not applicable.
- Note 2: The increase in total remuneration for Directors in 2024 as compared to 2023 was due to the increase in net income after tax in 2024.
  - 2. The policies, standards and packages for remuneration, the procedures for determining remuneration, and the relationship to operating performance and future risks.:
    - (1) Policies, Standards and Packages for Remuneration:
      - A. The remuneration of the Directors of the Company consists of three parts, which include the remuneration of the Independent Directors, Directors' Remuneration and Business Execution Expenses:
      - (A). Remuneration of Independent Directors: Independent Directors shall be paid a monthly salary by the Company regardless of the Company's profit or loss while performing their duties for the Company, which may be set or adjusted by the Company's Remuneration Committee in accordance with their participation in the Company's operations and the value of their contribution, and submitted to the Board of Directors for resolution. The Company's Independent Directors are not eligible to the distribution of Directors' remuneration as stipulated in the Company's Articles of Incorporation.
      - (B). Remuneration of Directors: In accordance with Article 30-3 of the Company's Articles of Incorporation, the Company may set aside up to 2.07% of the Company's annual profits (if any) for the purpose of determining the remuneration of individual Directors based on the Company's operating performance, as well as the assessment results of the duties, responsibilities, and performance of the individual Directors.
      - (C). Business execution expenses are in a fixed amount based on the actual number of board meetings attended.
    - B. The Company's managers are compensated as if they were regular employees. Depending on the Company's operating and profitability conditions, the Company's managers are evaluated based on their participation in the Company's operations, their scope of responsibilities within the Company, the circumstances under which they hold their positions, and their performance evaluations, taking into account his/her ability in realizing the Company's core values and operational management, financial and business performance indicators, and general management indicators, as well as other special contributions or significant negative events, he/she may be then be reasonably compensated with various prizes, bonuses and benefits accordingly. The Company provides bonuses, year-end bonuses, and other remuneration in accordance with the Company's "Rules Governing the Remuneration of Managers," the scope of responsibilities of the position, and the degree of its contribution to the Company's operating performance. In addition, if there is a profit in the current year, the Company shall, in accordance with Article 30-3 of the Articles of Incorporation, provide the

- employees with a remuneration of not less than 5.52% of the total amount. The remuneration will be calculated with reference to the financial operating performance data and non-financial contribution of each manager's responsible unit, and the remuneration system will be reviewed in a timely manner based on the actual operating conditions and relevant laws and regulations.
- C. The Company's remuneration packages, including cash compensation, stock options, severance pay, various allowances and other benefits with tangible incentives, are subject to review by the Remuneration Committee and discussion by the Board of Directors before being distributed.
- (2) Procedures for Determining the Remuneration of Directors, General Manager and Deputy General Manager of the Company.
  - A. The performance evaluation of the Company is based on the "Rules Governing the Performance Evaluation of the Board of Directors" and the "Rules Governing the Remuneration of Managers". In addition to making reference to the Company's overall operational performance, future risks and development trends of the industry, the Directors' remuneration is also internally evaluated through a self-assessment questionnaire. The evaluation indicators include: understanding of the Company's goals and tasks, the Directors' awareness of their duties and responsibilities, the extent of their participation in the Company's operations, the professionalism of the Directors and their continuing education, the results of internal control, etc., and the degree of their contribution to the Company, all of which result in the granting of a reasonable remuneration. As for the remuneration of General Manager and Deputy General Manager, they are approved with reference to the performance of the individual manager, the unit in charge, and the correlation between the Company's overall operational performance and future risks, which are then proposed by the Remuneration Committee and submitted to the Board of Directors for resolution.
  - B. The reasonableness of the performance appraisal and remuneration of the Company's Directors and managers are evaluated and reviewed by the Remuneration Committee and the Board of Directors on a regular basis each year, not only by making reference to the aforementioned factors, but also by taking into account the current trend of corporate governance, before granting them a reasonable remuneration in order to strike a balance between the Company's sustainable operation and risk control. The actual amount of remuneration to the Directors and Managers in 2024 has been reviewed and approved by the Remuneration Committee before being put forward to the Board of Directors for approval.
- (3) Correlation between Operating Results and Future Risks:
  - A. The Company's remuneration policy is determined primarily on the basis of the Company's overall operating conditions, and the standard of payment is determined based on the accomplishment rate and contribution of each unit, which reflects the operating efficiency of the Board of Directors and the management team. In addition, the Company makes reference to the industry's remuneration standards to ensure that the remuneration of the Company's management is competitive in the industry, so as to retain outstanding management talents.
  - B. The Company combines managerial performance goals with the "Risk Control" in order to ensure the management and prevention of possible risks within the scope of responsibilities, and integrates all relevant human resources and relevant salary and remuneration policies in accordance with the results of actual performance assessment. The management of the Company evaluates various present and future risk factors and makes appropriate assessments before making important decisions. The performance of such decisions is reflected in the Company's profitability, and thus the remuneration of the management is associated with the performance of risk control.
  - C. Correlation of Future Risks: The Company's remuneration will be evaluated and adjusted in consideration of future changes in the environment and operating performance, and Directors and Managers who are involved in unlawful acts that result in losses to the Company may be subject to disciplinary action as required by law.

#### 3. Corporate Governance Status

(1) Operation of the Board of Directors

A total of seven Board meetings were held as of the publication date of the annual report of the Board of Directors in 2024 and 2025 as of December 31, and the Directors' attendance at these meetings was as follows:

		0			
Title	Name	Actual No. of Meetings Attended	No. of Meetings with Entrusted Attendance	Actual Attendance Rate	Remarks
Chairman	Shieh, Raui-Mu	7	0	100.00%	Re-elected on May 31, 2024
Director	Xude Investment Co., Ltd. Representative: Hsia, Ching- Hsuan	7	0	100.00%	Re-elected on May 31, 2024
Director	National Development Fund, Executive Yuan Representative: Lai, Yung-Hsiang	6	1	85.71%	Re-elected on May 31, 2024
Director	Yeh-Chiang Technology Corp. Representative: Wang, Tai-Kuang	0	7	0%	Re-elected on May 31, 2024
Director	Chen, Chun-Ya	7	0	100.00%	Re-elected on May 31, 2024
Independent Director	Huang, Hsiang-Ying	2	0	100.00%	Resigned on May 31, 2024
Independent Director	Yang, Teng-Yu	2	0	100.00%	Resigned on May 31, 2024
Independent Director	Chen, Hsin-Liang	7	0	100.00%	Re-elected on May 31, 2024

The 2024 assessment has been completed in December 2024 and March 2025, and the results were reported in the Board of Directors' meeting held on December 19, 2024, and March 11, 2025. The following results: The overall average score of the Board of Directors' performance self-assessment: 4.94, the overall average score of the Board members' self-assessment: 4.93, the overall score for the Audit Committee's performance self-assessment: 5, the overall score for the Remuneration Committee's performance self-assessment: 5, the overall score for the Sustainable Development

Committee's performance self-assessment: 5, and the overall average score of the Risk Management Committee's performance self-assessment: 4.94. The scores ranged from good (agree) to excellent (strongly agree), indicating that the Directors are satisfied that the existing system of the Company's Board of Directors, including all functional committees, has been well established and operated. They have effectively promoted the Company's sustainable development, social responsibility, risk management, and corporate governance, in compliance with relevant laws and regulations.

- 4. Evaluation of the goals (e.g., establishment of an Audit Committee, strengthening of information transparency, etc.) and implementation status on strengthening the functions of the Board of Directors for the current year and the most recent year.
  - 1. The Company has established a Remuneration Committee on April 20, 2016 to assist the Board of Directors in implementing and evaluating the Company's overall remuneration and welfare policies.
  - 2. The Company's extraordinary shareholders' meeting on August 02, 2016 elected three additional Independent Directors and established an Audit Committee to replace the Supervisor System so as to strengthen the corporate governance functions of the Board of Directors.
  - 3. The Company has appointed a spokesperson and an acting spokesperson, and has been uploading material information related to the Company onto the Market Observation Post System for the purpose of strengthening the transparency of information to the public.
  - 4. On August 7, 2024, the Board of Directors approved the establishment of the "Sustainability Development Committee Organizational Regulations" and resolved to set up the "Sustainability Development Committee" to align with international development trends and achieve sustainability goals. The committee is composed of two independent directors and one senior executive, totaling three members. It meets at least once a year and reports its operations to the Board of Directors. The sustainability performance for 2024 was presented to the Board on December 19, 2024.
  - 5. On August 7, 2024, the Board of Directors approved the revision of the "Risk Management Policy and Procedures" and resolved to establish the "Risk Management Committee" to strengthen risk management. The committee is composed of two independent directors and one senior executive, totaling three members. It meets at least once a year and reports its operations to the Board of Directors. The risk assessment for 2024 was presented to the Board on December 19, 2024.
  - (2) The operating status of the Audit Committee or Supervisor's participation in the Board of Directors Meeting.

The Company has established an Audit Committee as of August 02, 2016.

- 1. Items subject to the Audit Committee's auditing include:
  - (1) The establishment or amendment of the internal control system in accordance with Article 14-1 of the Securities and Exchange Act.
  - (2) Assessment of the effectiveness of the internal control system.
  - (3) The procedures for handling significant financial operations such as acquiring or disposing of assets, engaging in derivative transactions, lending funds to others, and endorsing or providing guarantees for others are established or amended in accordance with Article 36-1 of the Securities and Exchange Act.
  - (4) Matters in which a Director has a personal interest.
  - (5) Significant asset or derivative transactions.
  - (6) Significant lending of funds, endorsement or guarantee.
  - (7) The raising, issuance, or private placement of securities with an equity nature.
  - (8) The appointment, termination or remuneration of CPAs.
  - (9) The appointment and dismissal of the supervisor of finance, accounting or internal audit.
  - (10) To review and discuss with the CPA(s) the annual financial statements and quarterly financial reports regarding the compliance with the

- domestic competent authorities' requirements, which are signed or affixed with seals by the Chairman, the Manager and the Accounting Supervisor.
- (11) Other material matters as stipulated by the Company or the competent authorities.

#### Operation of the Audit Committee:

A total of seven meetings were held by the Audit Committee in 2024 and 2025 as of the publication date of the annual report, and the attendance of the

Independent Directors was as follows.

Title	Name	Actual No. of Meetings Attended	No. of Meetings with Entrusted Attendance	Actual Attendance Rate (%)	Remarks
Independent Director	Huang, Hsiang- Ying	2	0	100.00%	Resigned on May 31, 2024

## (3) Corporate Governance Status, Deviations from the Corporate Governance Best Practice Principles for TWSE/TPEx Listed Companies and Reasons

			Implementation Status	Deviations from "the Corporate
Evaluation Item	Y es	N o	Abstract Illustration	Governance Best-Practice Principles for TWSE/TPEx Listed Companies" and Reasons
1. Does the Company follow the Corporate Governance Best Practice Principles for TWSE/ TPEx Listed Companies, and has the Company established and disclosed its own Corporate Governance Best Practice Principles?	V		The Company has established the "Corporate Governance Best Practice Principles" on March 16, 2023 to safeguard shareholders' rights and interests, strengthen the functions of the Board of Directors, respect the rights and interests of stakeholders, and enhance the transparency of information. The Company's website can be accessed at https://www.quaser.com/tw/Investors/Corporate Governance/Important Articles and Market Observation Post System/Corporate Governance/Relevent rules for the Establishment of Corporate Governance.	No major difference.
The Company's shareholding structure and shareholders' equity     Has the Company set up internal operating procedures to handle shareholder proposals, doubts, disputes and litigation matters and followed the procedures?	V		(1) The Company has set up a spokesperson and acting spokesperson system, and the Company's website also provides a dedicated e-mail address to handle shareholders' proposals, doubts, disputes and litigation-related matters.	(1) No major difference.
(2) Does the Company have a list of its major shareholders and the ultimate controllers of the major shareholders?	V		(2) The Company manages a list of major shareholders and their ultimate controllers in order to ensure the stability of its business operations. In addition, changes in the shareholdings of directors, managers, and major shareholders holding 10% or more of the shares are disclosed on the Market Observation Post System website in accordance with the provisions of Article 25 of the Securities and Exchange Act.	(2) No major difference.
(3) Has the Company established and implemented risk management and firewall mechanisms with its affiliates?	V		(3) The Company has established methods to control the management of related party transactions, endorsement and guarantee, and lending of funds between the Company and its affiliates. In addition, the Company has established the "Rules Governing the Supervision and Management of Subsidiaries" and the "Procedures for Group Companies, Specified by Public Companies" in accordance with the "Regulations Governing Establishment of Internal Control Systems by Public Companies" issued by the Financial Supervisory Commission, in order to regulate financial transactions and matters	(3) No major difference.

			Implementation Status	Deviations from "the Corporate

7. Information disclosure (1) Has the Company set up a website to disclose financial and corporate governance information?	V		(1) The Company has set up an official website (www.quaser.com/tw/) and an investor section to disclose information regarding the Company's financial operations and corporate governance, whereby information regarding the Company can also be accessed through the Market Observation Post System.	(1) No major difference.
(2) Does the Company adopt other information disclosure methods (such as setting up an English website, appointing a dedicated person responsible for the collection and disclosure of company information, implementing the spokesperson system, and posting the Company's corporate briefing process on the website, etc.)?	V		(2) The Company has assigned dedicated personnel to be responsible for the disclosure of information on the Exchange's Market Observation Post System and the disclosure of information on the Company's website, and has set up websites in both English and Chinese, with dedicated personnel responsible for the collection and disclosure of relevant information on the Company's finances and operations. The Company also has a spokesperson and an acting spokesperson to serve as a channel for outbound communication in accordance with the regulations. The information of the corporate briefing sessions is also posted on the Company's official website. With respect to the disclosure of corporate governance information, the Company has provided investors with important information on the Company, its financial condition, shareholders' meetings and dividend payments, internal audit structure and operation, and articles of incorporation on its official website.	(2) No major difference.
(3) Has the Company published and report annual financial report within two months after the end of a fiscal year, and publish and report financial reports for the first, second and third quarters as well as its operating status for each month before the specified deadline?		V	(3) The Company's quarterly and annual financial reports, as well as announcements and reports on operations for each month, were all completed within the deadlines required by the laws and regulations.	The Company will continue to comply with the regulations, standards and requirements as stipulated by the competent authorities in promoting the transparency of financial information, which is the goal that the Company has been striving to achieve.
8. Does the Company have any other important information (including but not limited to employee rights, employee care, investor relations, supplier relationship, rights and	V		(1) Employee Rights and Employee Care: The Company has established an Employee Welfare Committee, as well as a sound employee welfare measures, continuing education, training and retirement system; the Company has also set up a Human Resource Review Committee to collect employee grievances; and the Company holds	No major difference.

Directors and management.	submitted to the Sustainability Development Committee for review before being reported to
	the Board of Directors for oversight of various risk management strategies.
	(1) Sustainability Development Committee: Convenes at least once a year to assist the Board
	of Directors in continuously promoting sustainability development policies and
	enhancing corporate governance. The committee integrates sustainability into the
	Company's operational activities and development direction.
	(2) Risk Management Committee: Convenes at least once a year to consider various risks
	that may affect the achievement of business goals for management through a sound risk
	management framework and integrate them into operational activities and daily
	management processes through risk management.

- 2. Describe how the identified climate-related risks and opportunities affect the Company's business, strategies and financial affairs (for a short term, medium term or long term).
  - 2. Please refer to the image below:

Items	Short term	Medium term	Long term
Risks			
Transition risk

	is unaffected	area and is unaffected	area and is unaffected
2. Increased severity of extreme			Production disrupted, leading
weather events			to revenue loss
Opportunities			
Improvement in resource	Reduction in water usage and	Equipment	Improvement/simplification of
efficiency	consumption	upgrades/replacement	production processes
2. Hydrogen fuel cell	Development is gradually stabilizing,	Building a regional hydrogen	Cross-national hydrogen
development	with an increase in product demand,	energy network	energy recycling industry
	leading to an expansion in Quaser's		supply chain
	production capacity.		
Carbon emission calculator	Developing a software program for	Developing low-carbon products	Low-carbon products as one
	product carbon emissions	to increase revenue sources	of the key revenue sources

- 3. Describe the financial impact of extreme climate events and transformation actions.
- 3. We will continuously improve the analysis of physical risk scenarios and enhance the Company's climate adaptation management and strategy. As extreme weather events become more frequent, disruptions in production may occur if suppliers are unable to operate normally, resulting in production halts at the factory and a subsequent decline in Company revenue.

- 4. Describe how the identification, assessment and management processes of climate risks are integrated into the overall risk management system.
- 4. Our company adopts the TCFD framework to identify climate change-related risks and opportunities. Relevant department heads, taking into account the current operational status and available resources, develop tailored, practical, and effective management strategies for significant risk items.
- 5. If scenario analysis is used to assess resilience to climate change risks, the scenarios, parameters, assumptions and analysis factors used and main financial impacts should be explained.
- 5. Planning and evaluation are currently underway.

- 6. If there is a transition plan for managing climate-related risks, explain the content of the plan and the guidelines and goals for identifying and managing physical risks and transition risks.
- 6. To reduce the carbon emissions per unit of product and minimize environmental impact, the Company continues to explore methods to lower resource consumption. Efforts are made to reduce direct emissions from operational activities (Scope 1) and indirect emissions from energy usage (Scope 2), alongside the establishment of targets for electricity and water conservation, including:
  - (1) Replacing outdated equipment to reduce electricity consumption.
  - (2) Switching to LED sensor lighting to enhance energy efficiency and reduce carbon emissions.

- 7. If internal carbon pricing is used as a planning tool, explain the basis for price setting.
- 7. Internal carbon pricing has not yet been planned.
- 8. If climate-related goals are set, explain the activities covered, scope of greenhouse gas emissions, planning schedule, annual progress to be achieved and other information; if carbon offsets or renewable energy certificates (RECs) are used to achieve relevant goals, explain the source and quantity of reduction quota of carbon offset and the number of renewable energy certificates (RECs).
- 8. The Dajia Plant completed ISO 14064-1 verification and obtained external assurance statements for 2021, 2022, and 2023. Based on the inventory results, feasible reduction plans have been formulated. Currently, there are no plans to use carbon offsets or renewable energy certificates to achieve related targets.

- 9. Greenhouse gas inventory and confirmation and reduction goals, strategies and specific action plans (to be filled out separately in Sections 1-1 and 1-2).
  - 9. For details regarding greenhouse gas inventory and confirmation and reduction goals, strategies and specific action plans, please refer to Sections 1-1 and 1-2.

1-1 Greenhouse gas inventory and confirmation of the company in the past two years

# 1-1-1 Greenhouse gas inventory information

Describe the greenhouse gas emissions (metric tons of CO2e), intensity (metric tons of CO2e/NT\$ million) and data coverage in the past two years.

Item/Unit: Metric Tons / CO <sub>2</sub> Equivalent	Scope 1	Scope 2	Scopes 1 and 2	Turnover (NT\$ million)	Intensity of greenhouse gas emissions
2022	126.70	801.60	928.30	1,622	0.57
2023	128.78	735.17	863.95	1,311	0.66
2024 (Voluntary GHG Inventory)	124.47	735.17	859.64	1,653	0.52

- Note 1: Direct emissions (Scope 1, direct emissions from emission sources owned or controlled by the company), indirect energy emissions (Scope 2, indirect greenhouse gas emissions caused by the input of electricity, heat or steam) and other indirect emissions (Scope 3, emissions generated by the company's activities, which are not indirect energy emissions, but rather emissions from emission sources owned or controlled by other companies).
- Note 2: The data coverage for direct emissions and indirect energy emissions should be handled in accordance with the schedule stipulated in the order under Paragraph 2 of Article 10 of these Standards, and other indirect emission information may be voluntarily disclosed.
- Note 3: Greenhouse gas inventory standards: Greenhouse Gas Protocol (GHG Protocol) or ISO 14064-1 published by the International Organization for Standardization (ISO).
- Note 4: The intensity of greenhouse gas emissions can be calculated based on per unit of product/service or turnover, but at least the data calculated based on turnover (NT\$ million) should be described.

# 1-1-2 Greenhouse gas confirmation information

Provide a description of the confirmation situation in the past two years up to the date of publication of the annual report, including the scope of confirmation, confirmation institution, confirmation criteria and confirmation comments.

Item/Unit: Metric Tons / CO <sub>2</sub> Equivalent	Scope 1	Scope 2	Scopes 1 and 2	Assurance Standards	Assurance Opinion	
2022	126.70	801.60	928.30	ISO14064-1:2018 ISO14064-3:2019	According to the ISO 14064-3:2019 standard for greenhouse gas verification, the Precision Machinery Research & Development Center conducted the verification and obtained sufficient evidence to conclude that the greenhouse gas statement of Quaser is free from material discrepancies and fairly presents the greenhouse gas data and related information.	
2023	128.78	735.17	863.95	ISO14064-1:2018 CNS14064-1:2021 ISO14064-3:2019	According to the ISO 14064-3:2019 standard for greenhouse gas verification, the Precision Machinery Research & Development Center conducted the verification and obtained sufficient evidence to conclude that the greenhouse gas statement of Quaser is free from material discrepancies and fairly presents the greenhouse gas data and related information.	
Assurance Scope	No. 3, Gong 6th Road, Dajia District, Taichung City					
Assurance Provider	Precision Machinery Research Development Center					

Note 1: It should be handled in accordance with the schedule stipulated in the order under Paragraph 2 of Article 10 of these Standards.

If the company does not obtain complete greenhouse gas confirmation comments by the date of publication of the annual report, it should indicate that "any complete confirmation information will be disclosed in the sustainability report". If the company has not prepared a sustainability report, it should indicate that "any complete confirmation information will be disclosed on the public information observation station" and disclose any complete confirmation information in the annual report for the next year.

Note 2: The confirmation institution should comply with the relevant regulations for sustainability report confirmation institutions established by Taiwan Stock Exchange Corporation and Taipei Exchange.

# 1-2 Greenhouse gas reduction goals, strategies and specific action plans

Describe the greenhouse gas reduction base year and its data, reduction goals, strategies and specific action plans as well as the achievement of reduction goals.

To formulate effective greenhouse gas (GHG) reduction strategies, our Dajia Plant completed a GHG inventory in 2022, adopting the parent company only financial report as the organizational boundary. Accordingly, 2022 has been designated as the base year. Based on the inventory results, Scope 1 and Scope 2 emissions were recorded at 126.7 metric tons CO<sub>2</sub>e and 801.6 metric tons CO<sub>2</sub>e, respectively.

Although formal GHG reduction targets have yet to be established, the Company is proactively implementing concrete measures to advance emission reduction efforts. Carbon footprint management has been integrated into our business operations through the development of a carbon emission calculation system for processing machines, which earned the Special Excellence Award at the 2023 Machine Tool Exhibition. This system also supports ongoing evaluation of opportunities associated with the low-carbon transition, allowing for dynamic adjustment of related policies and initiatives.

We are committed to incorporating carbon reduction practices into our daily operations through the following initiatives: discontinuation of single-use tableware; gradual replacement of official vehicles with electric vehicles; phased retirement of outdated equipment; upgrading of lighting systems to energy-efficient alternatives; and digitization of internal forms and documentation.

Note 1: It should be handled in accordance with the schedule stipulated in the order under Paragraph 2 of Article 10 of these Standards.

Note 2: The base year should be the year in which the inventory of consolidated financial reports is completed, for example, in accordance with the order under Paragraph 2 of Article 10 of these Standards, companies with a total capital of more than NT\$10 billion should complete the inventory of their consolidated financial reports for 2024 by 2025, so the base year should be 2024. If these companies have completed the inventory of their consolidated financial reports in advance, the earlier year may be used as the base year, and the data for the base year may be calculated based on the average of data for a single year or several years.

(9) Performance of ethical corporate management and differences from the Ethical Corporate Management Best-Practice Principles for TWSE/ <u>TPEx Listed Companies and Reasons:</u>

Evaluation Item	Yes	No	Abstract Illustration	Management Best Practice Principles for TWSE/ TPEx Listed Companies and reasons
Setting business Ethical     Corporate Management     policies and programs     Ones the Company develop     business integrity policies to be     passed by the Board, and     express its commitment to the     policies and practices of Ethical     Corporate Management in its     regulations and in the external     documents, and do the Board of     Directors and the management     actively implement the business     policies?	V		(1) On November 9, 2016, the Board of Directors resolved to establish the "Ethical Management Best Practice Principles", "Code of Ethical Conduct for Directors and Managers", "Ethical Management Procedures and Code of Conduct" and other internal control measures, which stated the policy and practice of ethical management as well as the commitment of the Board of Directors and the management in actively implementing this management policy, and that the Board members and the management are executing the business in accordance with the principle of ethical management and have signed the Statement of Compliance with the Ethical Management Policy. In addition, the relevant ethical management policies are disclosed on the Company's official website and the Market Observation Post System to enhance awareness of the Company's philosophy of ethical management.	(1) No major difference.
(2) Has the Company establish a risk assessment mechanism against unethical conduct, analyze and assess on a regular basis business activities within their business scope which are at a higher risk of being involved in unethical conduct, and establish prevention programs accordingly adopted precautionary measures in respect of business activities with a high risk of dishonesty and at least include preventive	V		(2) The Company has established the "Ethical Management Best Practice Principles" and the "Ethical Management Procedures and Code of Conduct" to provide clear guidelines on prohibited behaviors, and has published the "Code of Conduct on Employee Integrity" on the Company's internal website. In addition to specifying various operating procedures, the Code of Conduct clearly outlines appropriate disciplinary actions for employees who violate ethical standards or engage in misconduct, as stated in the Employee Handbook. If any violations of government regulations or fraudulent activities are discovered, employees may report such incidents via email or written communication to independent directors, managers, internal auditors, or other appropriate personnel. Upon receipt of a report, the relevant personnel shall promptly escalate the matter to the Chairman.  The Code of Conduct also details the procedures and methods for

measure in Article 7(2) of the Ethical Corporate Management Best Practice Principles for TWSE/TPEx Listed Companies?			whistleblowing, including the establishment of an independent whistleblower mailbox available for both internal and external use, as well as guidelines for the retention of related records. This information has been disclosed on the Company's official website.		
(3) Has the Company set up a program for the prevention of dishonesty as well as the procedures, conduct guidelines and a disciplinary and appeals system in various programs and implemented them?	(3) Has the Company set up a program for the prevention of dishonesty as well as the procedures, conduct guidelines and a disciplinary and appeals system in various programs and		(3) The Company has established an effective internal control system to prevent the occurrence of unethical behavior, and reviews the internal control system from time to time to ensure its design and effective implementation. A grievance mechanism has been established, including the setup of an independent whistleblower mailbox in the Stakeholders section of the Company's official website, allowing both internal and external parties to report concerns. Additionally, after the date of each Board meeting is confirmed, Directors are reminded not to trade Company shares during the blackout periods — specifically, within thirty days prior to the announcement of the annual financial report and fifteen days prior to the announcement of each quarterly financial report.	(3) No major difference.	
Implementation of Ethical Corporate Management     Ones the Company assess the integrity record of its business partner, and stipulate the terms of conduct on integrity in the contract with the business partner?	V		(1) The Company has always been conducting its business activities in a fair and transparent manner. Prior to entering into business transactions, the Company also considers the legitimacy of the counter-parties and whether or not there is any unethical behavior, despite the fact that the Company does not stipulate the terms of ethical behavior in the business contracts, the Company still proclaims that no gifts will be offered to the counter-parties in any form.	(1) No major difference.	
(2) Has the Company set up a dedicated (or concurrent) corporate integrity promotion unit under the Board of Directors which report to the	V		(2) The Company's Management Office serves as a dedicated (part-time) unit responsible for the implementation and execution of corporate ethical management, and reports regularly to the Board of Directors on the implementation results. The status on the fulfillment of ethical management was reported to the Board of Directors on December 19,	(2) No major difference.	

			Implementation Status	Differences with Ethical Corporate	
Evaluation Item	Yes	No	Abstract Illustration	Management Best Practice Principles for TWSE/ TPEx Listed Companies and reasons	
Board of Directors on a regular basis (at least once a year) on supervising the implementation of the ethical corporate management policies and prevention programs?			2024.		
(3) Has the Company formulated policies to prevent conflicts of interest, provided appropriate channels for statements and implemented them?	V		(3) In the event of a conflict of interest, employees of the Company may report it directly to their direct supervisors or internal auditors through the employee suggestion box. The Company's senior managers and directors shall recuse themselves from the discussion and voting on the Board of Directors' meetings when they have an interest in the Board of Directors' motions.	(3) No major difference.	
(4) Has the Company established an effective accounting system and internal control system for the implementation of ethical corporate management, which is checked by the internal auditing unit based on the results of assessment of the risk of involvement in unethical conduct, devise relevant audit plans and examine accordingly the compliance with the prevention programs or engage audited by external auditors?	V		(4) The Company has established an effective accounting system and internal control system, which are reviewed and amended from time to time in accordance with changes in laws and regulations and practical needs, and are regularly reviewed by internal auditors to ensure that the system is designed and implemented in a continuous and effective manner.	(4) No major difference.	
(5) Does the Company hold regular internal and external training on business integrity?	V		(5) The Company has integrated ethical management into its corporate culture by organizing internal and external education and training (including courses on compliance with ethical management laws and regulations, environmental safety training, accounting systems, language courses and internal controls) related to ethical management	(5) No major difference.	

			Implementation Status	Differences with Ethical Corporate

			issues, with a total of 280 person-times and a total of 69,955 person-hours.			
3. Operation of the Company Reporting System  (1) Has the Company set up specific reporting and reward systems and a convenient reporting channel, and does the Company assign appropriate personnel to investigate the person being reported?	V		(1) If any employee of the Company is found to have violated the regulations related to ethical management, such violation may be reported directly to the direct supervisor of the department, the report mailbox on the Company's website, or to the internal auditor, and if such violation is found to be true, disciplinary action will be taken in accordance with the Company's relevant reward and penalty system. In 2024, no grievance cases were reported.	(1) No major difference.		
(2) Has the Company set up standard investigation procedures, follow-up measures to be adopted after investigations of cases reported are completed and a related confidentiality mechanism for the matter being reported?	V		(2) Should the Company identify or receive reports of unethical behavior involving the Company's personnel, and if it is verified that such violations of the relevant company management rules and regulations have occurred, the Company will immediately request the person in question to cease such behavior, take appropriate action, and if necessary, seek damages through legal proceedings in order to protect the Company's reputation and rights and interests, and will maintain confidentiality regarding the investigation process.	(2) No major difference.		
(3) Does the Company take measures to protect the reporter from improper treatment?	V		(3) When handling a case, the responsible unit must maintain confidentiality throughout the entire process and conduct the investigation through independent channels. Relevant investigation documents and files must also be kept in a safe place in order to protect the identity of the whistle-blower.	(3) No major difference.		
4. Strengthening of Information Disclosure Does the Company disclose the contents of Ethical Corporate Management Best Practice Principles and the effectiveness on its website and MOPS?	V		The Company has published its compliance with the Ethical Management Best Practice Principles on the Company's official website and the Market Observation Post System, and has set up a spokesperson to speak to the public in accordance with the regulations, so that shareholders, stakeholders, and the competent authorities can have a	No major difference.		

			Implementation Status	Differences with Ethical Corporate
Evaluation Item	Yes	No	Abstract Illustration	Management Best Practice Principles for TWSE/ TPEx Listed Companies and reasons
		better understanding of the Company's situation.		

- 5. If the Company has its own Ethical Corporate Management Best Practice Principles in accordance with the "Ethical Corporate Management Best Practice Principles for TWSE/ TPEx Listed Companies", please describe the difference between them: The Company has established the "Ethical Management Best Practice Principles" and the "Ethical Management Procedures and Code of Conduct", which clearly stipulate the requirements to be followed by the Company's staff and have no major differences from the "Ethical Corporate Management Best Practice Principles for TWSE/TPEx Listed Companies".
- 6. Other important information that will help to understand the operation of the Company's integrity:
  - (1) The Company complies with the Company Act, the Securities and Exchange Act, the Business Entity Accounting Act, the Political Donations Act, the Anti-Corruption Act, the Government Procurement Act, the Act on Recusal of Public Servants Due to Conflicts of Interest, the regulations related to TWSE/TPEx listings, and other laws and regulations related to business practices as the fundamental prerequisite for the implementation of ethical management.
  - (2) The Company's "Rules of Procedure of the Board of Directors' Meeting" stipulates that a director who has an interest in the motion presented at a meeting, whether by himself/herself or on behalf of an Institutional Director, shall explain the important contents of his/her interest at the board meeting and shall not participate in the discussion or voting on the motion if there is a risk of damaging the Company's interests, as well as recuse him/herself from the discussion or voting, and is not allowed to exercise his/her right to vote on behalf of other directors during the discussion or voting.
  - (3) The Company has established the "Procedures for Prevention of Insider Trading", which stipulates that Directors, Managers and employees are prohibited from disclosing material internal information to others, from seeking or collecting material non-public internal information that is not related to their personal duties from those who have knowledge of the Company's material information, and from disclosing to others any material non-public internal information that is not related to their duties and that is not known to them through business activities.

- (10) Other important information that facilitates the understanding of corporate governance operations may be disclosed together:
  - 1. For important financial/business information of the Company, it is published on the Market Observation Post System and the Company's official website in accordance with the relevant laws and regulations.
  - 2. The Company has established the "Procedures for Handling Internal Material Information" and the "Procedures for Prevention of Insider Trading" to serve as the basis for the Company's mechanism for handling and disclosure of material information, and reviews the relevant procedures from time to time to meet the requirements of the relevant laws and regulations and management needs. The relevant procedures are also disclosed on the Company's official website and the Market Observation Post System for employees to access at any time, and at the same time, the Company's insiders are notified from time to time concerning the attention to internal material information.
  - 3. The status on continuing education for the Company's directors in 2024 is as follows:

# (3) The Company's Dividend Policy and Status of Implementation

# 1. Dividend Policy

If there is a profit after tax in after closing of accounts, the Company shall first complete taxation in accordance with the law, and then make up the losses for the preceding years, set aside a legal reserve of 10% of the net profit. Where such legal reserve amounts to the total paid-in capital, this provision shall not apply. Aside from the aforesaid legal reserve, the Company may, under its regulations, set aside another sum as special reserve or make reversals thereof; if there are still earnings after the aforesaid distribution, a proposal for distribution of such earnings combined with cumulative undistributed earnings may be proposed by the Board of Directors. Where such distribution is to be made in the form of new share issuance, a proposal shall be submitted to the shareholders' meeting for resolution and distribution.

The Board of Directors under authorization of the Company in accordance with the law shall have the legal reserves and capital reserves as prescribed in Article 241, Paragraph 1 of the Company Act paid in cash after a resolution has been adopted by a majority vote at a meeting of the Board of Directors attended by two-thirds of the total number of directors; and in addition thereto a report of such distribution shall be submitted to the shareholders' meeting. The shareholders eligible for the distributed shareholders' dividend shall be limited to those listed on the shareholders' roster as of the record date for the dividend. The Company shall make distribution of dividend with a total amount no lower than ten percent of the earnings distributable for the year based on the overall circumstances and growth characteristics of the industry, in consideration of the Company's profiting status and future operation needs, with the sustainable operations of the Company as objective and shareholders' equity and the Company's long-term financial planning taken into account.

Where the Company distributes dividend, such distribution may be made in cash or new shares based on the earnings status and overall industry circumstances, provided that the distribution in cash dividend is not lower than sixty percent of the total dividend distributed for the year.

2. Proposed Dividend Distribution at the Shareholders' Meeting
The proposed distribution of the Company's 2024 earnings was approved by the
Board of Directors in a motion presented on March 11, 2025 and the proposed
distribution is as follows:

	Unit: NT\$
Items	Amount
Undistributed earnings at the beginning of the year	20,914
Remeasurement of defined benefit plans recognized in retained earnings	3,891,496
Undistributed earnings after adjustment	3,912,410
Net profit for the current period	212,591,857
Deduct: 10% legal reserve	(21,648,335)
Distributable earnings for the year	194,855,932
Distribution Items:	
Cash Dividend (NT\$3 per Share)	(164,850,000)
Undistributed earnings at the end of the year	30,005,932

- (4) Impact on the Company's operating results and earnings per share from the proposed bonus shares at the regular shareholders' meeting: Nil.
- (5) Compensation of Employees and Directors.

- 1. The percentage or scope of the bonuses of Employees and Directors stipulated in the Articles of Incorporation:
  - If the Company makes a profit for the year, an amount not less than 5.52% for employees' compensation and not more than 2.07% for directors' compensation shall be appropriated. However, the Company shall prioritize the amount to be appropriated to cover any accumulated losses. For employees' stock or cash compensation, only those employees who are still employed by the Company on the date of distribution shall be eligible, including employees of subsidiaries who meet certain criteria.
- 2. The basis for estimating the amount of compensation to employees, directors and supervisors, the basis for calculating the number of shares of employees' compensation to be distributed by means of stock dividends, and the accounting treatment in the event that the actual amount of compensation distributed differs from the estimated amount: The compensation to employees, directors and supervisors of the Company is distributed in accordance with the Company's Articles of Incorporation. If there is a discrepancy between the actual distribution amount resolved in the stockholders' meeting and the estimated amount, the discrepancy will be regarded as a change in accounting estimate and adjusted in the year in which the stockholders' meeting resolves the adjustment, and will be recognized as profit or loss in the year of the stockholders' meeting.
- 3. The status on compensation distribution approved by the Board of Directors:
  - (1) The amount of compensation to employees, directors and supervisors may be distributed in the form of cash or stock. If there is any difference between these amounts and the estimated amounts in the year of expense recognition, the Company should disclose the differences, the reasons for the differences, and how the differences were handled: The Company's Board of Directors' meeting on March 11, 2025 resolved to distribute NT\$15,880 thousand as compensation to employees and NT\$5,950 thousand as compensation to directors, all of which were paid in cash, and the amounts were the same as the estimated amounts.
  - (2) The amount of employee compensation distributed in stock and the percentage of total net income after tax and total employee compensation for the current period for individual or separate financial statements: The Company did not distribute any employee compensation in the form of stock in 2024. Therefore, it is not applicable.
- 4. The actual distribution of employees', directors' and supervisors' compensation in the previous year (including the number of shares distributed, amount and price of the shares), and the difference between the actual distribution and the recognized employees', directors' and supervisors' compensation, including the amount, reasons, and handling of the difference: The Company's Board of Directors' meeting on March 12, 2024 resolved to distribute NT\$3,464 thousand as compensation to employees and NT\$1,299 thousand as compensation to directors, all of which were paid in cash, and the amounts were the same as the estimated amounts.
- (6) Share Repurchased by the Company: Nil.
- 2. Corporate Bonds (Including Overseas Corporate Bonds): Nil.
- 3. Preferred Shares: Nil.
- 4. Overseas Depositary Receipts: Nil.
- 5. Employee Stock Options: Nil.
- 6. Issuance of Restricted Stock for Employees: Nil.
- 7. Issuance of New Shares for Merger, Acquisition or Exchange of Other Companies' Shares: Nil.
- **8.** Financing Plans and Implementation: As of the publication date of the annual report, there was no incomplete capital utilization plan or completed plan with benefits yet to be realized.

Total	2,770,750	100.00%	3,240,019	100.00%	

# 3. Currently, the Company's products (services) are as follows:

The Group's main products are Computer Numerical Control (CNC) machines, which belong to the metal cutting machine manufacturing industry of industrial machinery, and are the essential machinery and equipment for all kinds of basic and precision machining, with applications in aerospace industry, national defense industry, automotive industry, general machinery, metal product processing industry and electronic industry, etc. The main categories of the Company's machine products are as follows:

Item	Type	Model	Usage	Applied Industries
1	Vertical machining	MV1 series	Mass production	Machinery, automotive,
	center	MV2 series	component processing	electronics, molds, etc.
2	Vertical swivel machining center	MV154APC series MK603 series	Mass production component processing	Machinery, automotive, aerospace, electronics, molds, etc.
3	Multi-face machining center	MF series	Complex curve- surfaced component processing	Machinery, national defense, automotive, aerospace, electronics, molds, medical, etc.
4	5-axis machining center	UX series MK5U series	Complex curve- surfaced component processing	National defense, aerospace, electronics, molds, medical, etc.
5	Horizontal machining center	HX series	Massive mass production component processing	Machinery, national defense, automotive, aerospace, etc.
6	Horizontal flexible manufacturing units	HX CELL series	Small quantity with wide variety component processing	Machinery, national defense, automotive, aerospace, etc.

Item	Type	Model	Usage	Applied Industries
7	Multi-face+5-axis flexible manufacturing units	MF / UX CELL	Complex curve- surfaced, small quantity with wide variety component processing	National defense, aerospace, electronics, molds, medical, etc.
8	Turning and milling machine	MTG500	Complex curve- surfaced, small quantity with wide variety component processing	Machinery, national defense, automotive, aerospace, electronics, molds, medical, etc.

4. New products (services) that are planned for development

4. New products (services) that are planned for development				
Item	New technologies or improvements			
High-precision vertical machining	Incorporation of ESG-oriented designs and components			
center	to improve existing long-selling products.			
NC DC	Development of proprietary flexible manufacturing HMI			
NC-PC	interfaces by Windows PC.			
	Introduction of unique machine structure, enhanced			
New generation 5-axis machining	machining/chip removal/operating capability, and			
center	technology collaboration with renowned aerospace			
	equipment manufacturers.			
	Combine generative AI with controllers to aid users in			
Computitive A.I. Assistance Compies	solving data searches, shortening learning curves,			
Generative Al Assistance Services	providing notifications of machine status, and enhancing			
	safety alerts.			
Extanded flexible manufacturing	New automated plate storage system for existing 5-axis			
	machines to meet high and varying production demands			
product line	at the same time.			
D 14: 1 : 1 1: 1	Accurate and real-time control of energy consumption of			
Keai-time carbon emissions display	machines.			
	Item High-precision vertical machining center NC - PC New generation 5-axis machining			

# (2) Industry Overview:

# 1. Current Status and Development of the Industry

As of 2024, the cumulative export value of machine tools reached approximately US\$2.218 billion, representing a 14.8% decrease compared to the same period in 2023. Among them, the cumulative export value of metal cutting machine tools was US\$1.834 billion, down 16.8% year-on-year, while the cumulative export value of metal forming machine tools was US\$383 million, down 3.7% compared to the previous year.

In 2024, the top ten export destinations for machine tools by export value were Mainland China (including Hong Kong), the United States, Turkey, India, Vietnam, Thailand, Germany, the Netherlands, Japan, and South Korea.

2024 Statistical Analysis of Taiwan Machine Center Exports by Country

Unit: US\$

Rank	Country	2024 Exports	2023 Exports	Compared to the Same Period (%)
1	Mainland China (including Hongkong)	630,585	712,685	-11.5%
2	The United States	341,306	377,814	- 9.7%
3	Turkey	192,287	289,789	-33.6%
4	India	145,867	120,701	20.8%
5	Vietnam	89,562	71,364	25.5%
6	Thailand	79,522	67,474	17.9%
7	Germany	58,136	78,265	-25.7%
8	the Netherlands	57,247	84,343	-32.1%
9	Japan	52,265	66,557	-21.5%
10	South Korea	48,670	40,104	21.4%
	Other Countries	522,456	692,789	-24.6%
	Global Total	2,217,903	2,601,885	-14.8%

Source: Customs Administration, MOF, R.O.C.; Data collected by: TMBA

Based on the information provided by the Taiwan Machine Tool & Accessory Builders' Association (TMBA), the global economy in 2024 has been affected by multiple factors, including uncertainties surrounding national election policies, heightened geopolitical tensions in the Middle East and between Russia and Ukraine, rising inflation, increased raw material and logistics costs, and exchange rate fluctuations. These issues have raised concerns over the prospects for economic recovery. As a result, capital expenditures have become more cautious, leading to weaker demand. Looking ahead to 2025, the global economy is expected to continue facing numerous uncertainties, such as the potential implementation of new policies under former U.S. President Donald Trump, the ongoing restructuring of global supply chains, and economic and trade changes driven by international netzero carbon emission policies. While these challenges add volatility, they are also expected to stimulate investment demand. Meanwhile, the increasingly severe labor shortages caused by declining birth rates are accelerating the industry's shift toward automation, digitalization, and green transformation.

For the machine tool industry, these trends represent not only challenges but also significant opportunities for growth and development.

2. Relationship between the upstream, midstream and downstream industries

Due to the complexity of the manufacturing process of machines and the large number of components required, most of the raw materials required are supplied by component suppliers, followed by professional design, integration, and assembly by machine manufacturers, and the relationship between upstream, midstream, and downstream is as follows:

# 3. Various Development Trends and Competitions of the Products

The development trend of Taiwan's machining center can be roughly categorized into seven directions: automation system integration, high efficiency machining, multi-axis precision machining, massive machining, machining center, smart machining, and green energy machining.

#### (1) Automation System Integration

Due to the demand for automated production caused by the declining labor force and rising wages in Mainland China, there is a trend of gradual increase in automation. Therefore, many machine manufacturers who originally produced single machines have switched to single or multi-machine with robotic arms as a way to bring more value to the products.

#### (2) High Efficiency Machining

High-efficiency machining has always been the key to improving productivity and reducing costs for machine customers, with many machine manufacturers now focusing on this feature in developing new machines to meet the needs of the global manufacturing industry.

#### (3) Multi-Axis Precision Machining

Other than integrating multiple models and automation facilities to provide flexible and automated production, machine manufacturers are also actively working towards the development of machine tools that are capable of performing a variety of different machining methods on a single machine simultaneously. For example, by machining metal on a machine with multiple axes, not only can it reduce the time for loading, unloading and line switching, but it can also utilize various axes in conjunction with the main cutting spindle, which enables workpieces to be machined in a single machining process.

# (4) Massive Machining

The energy policy of the United States in recent years has called for a reduction in imports from overseas, as well as substantial increase in its own self-sustainability rate, while encouraging enterprises to carry out energy development, and is now shifting towards an energy-exporting country, with more requirements for oil and gas development-related equipment and transportation systems, massive machines, such as gantry machining centers, massive vertical lathes, massive horizontal lathes, and massive milling machine processing, etc., have all become a top choice for the energy industry's procurement.

#### (5) Machining Center

In the development of the aerospace industry, 5-axis machining and machining centers are the most representative machining center products procured, due to the most complex shapes of components and the highest machining precision requirements.

#### (6) Smart Machining

With the rapid emergence of smart manufacturing, the importance of the machine tool hardware structure has become less important, instead, the use of APP to monitor the CNC machines has emerged, with international machine manufacturers such as DMG/MORI, MAZAK, OKUMA, etc. have all invested a large number of talents and resources in the design of the company's own APP for controlling the CNC machines, focusing on the appeal of smart manufacturing, which allows APP access by smart phones, tablets, etc. from remote locations to control the entire CNC machine via Internet and the plant's intranet site. With regard to intelligent robots, it will also be an extremely important development trend for the precision machinery industry in the future, and major foreign manufacturers, including Japan's FANUC, have been actively moving towards the development of intelligent robots with visual sensors and force sensors to significantly enhance their smart functions.

#### (7) Green Energy Machining

With the advancement of precision and functionality in the machines, the impact on the environment is also increasing. Therefore, the design of green machines with energy-saving functions will become the future trend.

#### (3) Technology and R&D Overview

1. R&D expenditures for the most recent year and as of the publication date of the annual report

Unit: NT\$ thousand; %

Item / Year	2024
R&D expenditures	133,193
Net operating income	3,240,019
Percentage (%)	4.11%

2. Successful development of technologies or products for the most recent year and as of the publication date of the annual report

Item No.	Successfully developed technologies or products
1	Multi-functional machining center
	Model Name: Mill Turn and Grind Multi Task Center
2	Automated 5-axis multi-tasking machining center
	Model Name: MF700 Cell
3	Inverted 5-axis machining center
	Model Name: IM8
4	Next-generation machining center series
	Model Name: MV1 MV2 MV3 MV4 MV5 MV6

# (4) Long-term and short-term business development plans

Ever since the establishment of the Group, the Group has been actively expanding its high-precision and automated production equipment, with a view to enhancing the production efficiency, expanding the production capacity and improving the technological level, developing towards high value-added products, and creating operational efficiencies. The short-term and long-term development plans of the Company are hereby presented as follows:

# 1. Short-term Business Development Plans

#### (1) Marketing Strategies

A. To secure the domestic and overseas market channels, and to develop the emerging market distributors:

Particularly on Quaser's export to Europe. In recent years, Quaser has also developed the emerging markets of China and Southeast Asia, and has built up its marketing model through exhibitions and advertisements.

B. Establishment of good relationship with end customers through distributors in different countries:

By utilizing the distributor system to localize the service, we will be able to establish a seamless service with our end customers.

C. Establishment of technology centers in Europe, US and China:

To provide machine supply with short delivery time, with zero time lag for technical and component services and machining applications.

D. Strengthening of customer service quality system:

To establish a two-way communication channel between the Company and the customer, and to provide after-sales services, prioritize customer feedback, and strive for customer satisfaction in order to stabilize the long-term relationship with customers.

# (2) Production Strategies

A. Promotion of smart production lines:

Paperless and real-time reporting system for production lines, visualization of production lines, enhanced education and training for versatile employees, introduction of TPS through M-Team consultant education and training, elimination of production line waste, and improvement of production line efficiency.

B. Standardization and improvement of product qualities:

By introducing a full-featured 48-hour non-stop test, we will be able to simulate

the customer's processing conditions and production environment, thereby optimizing the quality and performance of the machine.

C. Supplier/third party manufacturer quality consulting

By participating in SPEMA cross-industry alliances and M-Team, we are able to satisfy the customization of products and short delivery time through service differentiation, increase the value of the industry, and strive to achieve the goals of high quality, short delivery time, and low cost productions with our supply chain partners.

#### (3) Product Development Direction

A. Integration of internal products and creation of new specifications for mass production of 3-axis machining centers:

Establishment of a standardized product group that incorporates ESG mindset, introduction of energy-saving and sustainable design methods and components, and embedding of generative AI to enhance users' product experience.

B. Products' capability of meeting customer's service life and Quaser's warrantied original maximum output value:

Further development of new products with high quality and long-lasting performance, and a new product lineup with a five-year warranty.

C. Crossover products development:

With the resources of subsidiaries, the Company will collaborate in the production of turbine engine blade laser drilling machines for aerospace and other applications, as well as horizontal product expansion; and collaborate in the development of new manufacturing processes for semiconductor wafer laser drilling machines across multiple fields.

D. Machining center smart compensation:

For the demand of diversified and small amount of processing in the whole line, the integration of smart online measurement and compensation processing will be carried out by specialized projects; the introduction of single-machine products will enable them to meet the ever-changing and flexible needs of the customers.

#### (4) Business scale and financial synergy

A. Refinement of management and enhancement of administrative efficiency: Effective planning of the company's management system, implementation of enterprise information computerized operation, with a view to building full information integration, analysis and customer service, promoting performance management system, and improving administrative efficiency.

B. Financial management:

Establishment of financial policies and proper utilization of funds.

- C. Implementation of internal audit system:
- D. Emphasis on staff training and development:
- 2. Long-term Business Development Plans
  - (1) Marketing Strategies
    - A. Strengthening of brand image

Quaser Machine Tools has been marketing worldwide under the "QUASER" brand, and is well known in the industry for its high quality and service value, which has also been recognized by the "National Award of Outstanding SMEs". Quaser Machine Tools will continue to improve its professional image, and gain the trust of customers for the Quaser brand, so as to expand its brand awareness and enhance its competitive edge.

B. Cross-unit resource integration

Flexibility in adjusting organizational structure and integrating cross-unit resources to meet the needs of internal and external customers.

#### (2) Production Strategies

A. Introduction of Toyota-style management

Lower inventory costs, reduced manufacturing process waste and shorter delivery times.

#### B. Adjustment of production structure model

To make adjustments to the production structure in accordance with the industrial cycle, gradually adjusting from a multi-capacity model to a specialized division model, and striving to maximize the efficiency of production.

# (3) Product Development Direction

#### A. Product positioning of quality and long-lasting:

Adhere to the premise of technological progress, focusing on the expansion of inner-culture prior to the production. Our many years of experience in both domestic and international after-sales service has been transformed into the core of our products, and we take excellent quality and long-lasting functionality as the direction of our product development. From the actual customer needs, we adopt the technical solutions that are able to maximize the benefits of Quaser, as well as the products that fit the customers' production lifespan needs.

B. Technical collaboration with major British, German and Japanese machine manufacturers:

In the future, Quaser will collaborate with well-known British aerospace manufacturers to produce a series of aerospace products which will be applied to the aerospace industry. Meanwhile, Quaser will also combine the market strengths of Germany and Japan to carry out technological collaborations for the joint research and development and manufacturing of machining centers.

#### C. New aspects that incorporate ESG mindset

To strike a balance between product functionality and sustainability. In terms of environmental factors: We introduce energy-saving monitoring and low energy consumption technologies. In terms of social factors: We design our products with operator safety and health in mind, and adhere to the principles of human rights and labor rights during the manufacturing process. In terms of governance: We comply with environmental and social laws and regulations. Through regular evaluations and improvements, we fulfill our responsibilities to the environment, society, and governance.

#### (4) Business scale and financial synergy

- A. The Company will keep expanding its business scale in a steady pace, actively cultivate corporate governance, implement internal auditing, cultivate excellent R&D talents, strengthen R&D capabilities in order to enhance product competitiveness, and combine long-term marketing strategies and production policy goals to improve production efficiency and product quality, so as to gradually expand its operating lines and business scale.
- B. Expansion of operating scale through the development of new markets and continuous growth in existing markets.

#### 2. Market and Sales Overview

#### (1) Market analysis

1. Main product (service) sales (provision) areas

Unit: NT\$ thousand

Year		20	23	2024		
Area		Amount	%	Amount	%	
]	Domestic	161,253	5.82	379,696	11.72	
	Europe	1,282,767	46.30	1,338,998	41.33	
Ov	Asia	456,760	16.48	646,262	19.94	
ers	America	868,313	31.34	861,862	26.60	
eas	Others	1,657	0.06	13,201	0.41	
	Total	2,770,750	100.00	3,240,019	100.00	

#### 2. Market Share

Unit: NT\$ thousand

Item	2023	2024
Total sales of Taiwan's machining centers	23,492,422	18,857,391
Total sales of the Group's machining centers	1,091,926	1,191,310
Market share	4.65%	6.32%

Source: Department of Statistics, MOEA, prepared by Quaser.

Based on the statistical analysis by the Department of Statistics, MOEA, the sales of machining centers in Taiwan amounted to NT\$23,492,422 thousand and NT\$18,857,391 thousand in 2023 and 2024, respectively. If calculated using the sales of the Group's machining centers in 2023 and 2024, the market share of the Group's machining centers in Taiwan were 4.65% and 6.43%, respectively.

#### 3. Future market demand/supply and growth

# (1) Future market supply

The application of machining center covers automotive, bicycle, aerospace, molding, national defense, biomedical equipment and 3C industries, proving that the scope of application is extremely broad, and that the energy and aerospace industries will be the key markets in the coming years. Currently, in addition to capitalizing on the cost advantage of Taiwan's machine tool industry in entering the international market, the industry is also making every effort to develop manufacturing services to promote the upgrading of machining products and increase market supply.

#### (2) Future market demand

Based on the survey of American Machine Tool Association, nearly half of the annual output value of the global machines were sold to the automotive and motorcycle parts and components production lines. In recent years, with the rapid development of the electronics industry, the 3C products production line has become the fastest-growing market among the machine tool products. The direction of machine tool industry development planning will likely continue to focus on the 3C industry or its peripheral products. Given the characteristics of light, thin, short, and small electronic products, the precision requirements of components are becoming more demanding, while the requirements of the automotive industry for machines are moving in the direction of larger size and automation.

#### (3) Future market growth

- A. The implementation of quantitative easing in Europe has raised inflation expectations and stimulated manufacturers' willingness to invest in equipment.
- B. As the U.S. economy continues to improve, some European markets have regained growth momentum, and the decline in international crude oil prices has stimulated demand in the automotive market. It is anticipated that the demand for machines in the relevant regions will be greater than that of the previous year.
- C. The rise of new players in Southeast Asia, including India and Indonesia, is expected to bring another wave of demand and opportunities to the global machine tool industry.

#### 4. Competitive niche

(1) The Company commits itself to the profession, whose image is also well recognized.

The Group has been established for more than 30 years, with its own brand "QUASER" boasting a good reputation and image. Over the years, the Group has been adhering to a high quality policy and striving to fulfill its customers' satisfaction, and has passed the ISO9001 certification of the international quality management system in 2012, and its products comply with the European Union's CE safety standards. The Group places strict requirements on the quality of its products and technological standards, and constantly researches and develops new products, and with its comprehensive product line, the Group has been able to hold a considerable competitive edge in the machine market.

(2) Management team with professional and rich experience.

The Group's current management team members focus on the operation of the basic machine tool industry, and the key executives are experienced in the changing industry environment, product development trend, production and manufacturing, and marketing operations, etc. The Company's revenue and profit have shown year-on-year growth in recent years, which demonstrates the professionalism of the management team and the outstanding operational performance.

(3) Competent R&D capability and advanced technology of products.

In addition to actively engaging in the R&D of manufacturing process technologies, the Group also collaborates with the Mechanical and Mechatronics Systems Lab and Precision Machinery Research & Development Center ("PMRDC") to acquire technology transfer and the latest product information, which enables the Group to have a competitive edge in the development of production technologies; and innovates based on the existing foundation, which has resulted in fruitful R&D achievements over the past years.

(4) Flexible production and proper positioning and differentiation strategy.

In order to cope with the demand for customized products and shortened delivery time, the Group has been continuously seeking to increase the added-value of its products and establish outsourcing systems and modular production technology to reduce production costs and shorten delivery time. In addition, with a comprehensive range of products and solid product development capabilities, the Group has positioned its products in the high value-added premium machine market, and has secured a position in the mid-range and high-end machine market dominated by Japan and Germany by capitalizing on its pricing advantages, while avoiding price competition in the industry.

(5) Expansion of domestic and overseas points of sale and provision of sound after-sales services.

The Group collaborates with distributors with sales and maintenance capabilities and provides them with logistic and technical support to enhance their marketing and service capabilities, enabling them to expand their domestic and overseas sales markets, provide immediate after-sales support and build up a good brand image.

(6) Stable supply sources and reduced production costs

The Group possesses an organized and systematic supply chain management system and has been collaborating with suppliers of key components such as controllers and precision bearings for a long time, and has formed a good partnership with them over the years. Meanwhile, in order to expand its production capacity, the Group adopts bulk procurement, which allows for greater bargaining room and a stable source of supply of raw materials at relatively low prices, thus providing the Group with a competitive edge in the product market.

- 5. Favorable and Unfavorable Factors and Countermeasures for the Development Outlook (1) Favorable factors
  - A. Development of the own brand

The Group markets its products worldwide under the "QUASER" brand name, and is well known in the industry for its high quality and service value, which has been awarded the "National Award of Outstanding SMEs", and the excellent brand image has been well established in the public's mind.

B. Outstanding R&D and innovation capabilities

Since the establishment of the Group, we have been actively investing in the R&D resources each year, cultivating R&D personnel, developing high-precision, high-efficiency and automated products, and have earned a number of international certificates and patents as well as gaining a competitive edge in product development; Quaser Machine Tools has also been technically collaborating with major manufacturers in Germany, the U.S., and Japan with an eye to upgrading our technology and strengthening our core competitiveness.

#### C. On-time after-sales services

The Group collaborates with distributors with sales and maintenance capabilities and provides distributors with training and logistic support. In addition, the Group has also established a comprehensive service network in North America, Europe and China by setting up technical centers in the U.S., Germany and China. Together with the local distributors, the Group is able to provide prompt spare parts replacement and consultation services to satisfy the needs of its customers in North America, Europe and China in terms of timely delivery, repairs and various needs.

D. Wide range of domestic and overseas points of sale and sound services.

The Group has established long term and reliable relationships with distributors both domestically and internationally to provide users, distributors and customers with comprehensive support, technical services, machining applications and training centers. The Group has also invested in the establishment of a 5-axis training center to provide training to users, distributors and employees, coupled with the Precision Machinery Research & Development Center and industry-academia cooperation, to satisfy the needs of machining applications, 5-axis machining or multi-face machining.

#### E. Excellent product quality

Over the years, the Group has been adhering to the philosophy of quality, service and efficiency, and has long been committed to the development of machine safety technology, providing machines that comply with safety design standards around the world. Our products have been certified by CE, GB, ISO, UKCA certifications.

F. Vertical labor division between the central plant and third party plants

With the sophisticated centralized network of Taiwan's machine tool industry, Quaser is able to establish a fast supply network through the long-term collaboration with component manufacturers to improve production efficiency and flexibility.

#### (2) Unfavorable factors

- A. The Group's products are mainly exported, and drastic changes in the exchange rate market will pose a greater impact on the Company.
  - a. Devaluation of the Euro

The Group focuses on the European machine tool market. Following the quantitative easing policy led by the European Central Bank, the euro has devalued significantly, which, in addition to currency exchange losses, has also reduced Quaser's price advantage in the European machine tool market.

b. Devaluation of the Japanese Yen

The devaluation of the Japanese yen has resulted in a significant disadvantage for Taiwan's machine tools in terms of price competition.

B. Reliance on foreign suppliers for key components

Key components such as controllers and spindles, are mostly supplied by major German and Japanese manufacturers and account for a high percentage of the cost, rendering the bargaining power relatively less flexible.

#### (3) Countermeasures for unfavorable factors

A. Countermeasures for the exchange rate

The Group's products are mainly exported, particularly in the European market, which is the largest market. Changes in import and export exchange rates will affect the profitability.

- a. Gradually reduce foreign currency inventories to lower the risk of foreign exchange fluctuations.
- b. Increase the ratio of derivative financial instruments (pre-sale of forward foreign exchange) to lower the risk of foreign exchange loss that may arise from future collections.
- c. Establish an internal control system and implement it in a continuous manner.

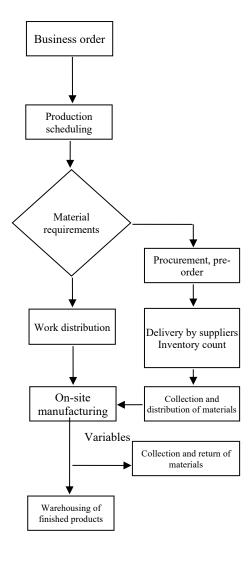

- B. Countermeasures for the reliance on foreign suppliers for key components.
  - a. The Group collaborates with a number of suppliers to diversify its supply sources.
  - b. Reduce procurement costs by bulk procurement.
  - c. Keep strengthening our partnership with German manufacturers and actively seek collaboration with other well-known manufacturers to strengthen our self-manufacturing capabilities and reduce our reliance on the procurement of key components from overseas.
- (2) Important usages and manufacturing processes of major products
  - 1. Important usages of major products

The Company mainly engages in the development, design, production, manufacture and trading of Computer Numerical Control (CNC) machine tools, primarily as metal and non-metal cutting machine tools. The products are widely used in the component processing for machinery, national defense, automotive, aerospace, electronics, molding, and medical industries. The Company's products feature high precision, high rigidity, heavy cutting processing, and the major products are categorized as follows:

Item	Type	Usage	Applied Industries
1			Machinery, automotive,
	center	processing	electronics, molds, etc.
	Vertical swivel		Machinery, automotive,
2		processing	aerospace, electronics, molds,
	8		etc.
	Multi-face machining	K ombley clirve-slirtaced	Machinery, national defense,
1 )	_	component processing	automotive, aerospace,
	Center	component processing	electronics, molds, medical, etc.
4	5-axis machining	Complex curve-surfaced	National defense, aerospace,
	center	component processing	electronics, molds, medical, etc.
5	Horizontal machining	Massive mass production	Machinery, national defense,
3	center	component processing	automotive, aerospace, etc.
6	Horizontal flexible	Small quantity with wide	Machinery, national defense,
0	manufacturing units	variety component processing	automotive, aerospace, etc.
	Multi-face+5-axis	Complex curve-surfaced, small	National defense, aerospace,
7	flexible manufacturing		electronics, molds, medical, etc.
	units	component processing	electronics, moids, medical, etc.
	Turning and milling	Complex curve-surfaced, small	Machinery, national defense,
8	machine	quantity with wide variety	automotive, aerospace,
	macmine	component processing	electronics, molds, medical, etc.

#### 2. Production Process

The production process of the Company adopts the production schedule in accordance with the business orders, and the procurement will be proposed upon systematic integration of the material requirements. The production management department will distribute the works in accordance with the production schedule to the production units and the material department for material collection and production. The finished products are then inspected and stored in the warehouse before shipment.

Shipment

# (3) Supply of key raw materials

The key raw materials for the Company's products are controllers, castings, transmission mechanisms, and sheet metal, all of which are sourced from domestic suppliers of high quality or from well-known overseas manufacturers. The Company works well with all suppliers, and the procurement prices are revised regularly in accordance with the actual global raw material supplies and costs.

Key Material	Supplier	Source and Quality
Controller	Company A, Heidenhain, Company B, Mitsubishi	Manufactured in Japan and Germany, supplied by domestic distributors, with stable quality and supply.
Casting	Company E, Company D, Saw Chen	Made in Taiwan, with stable quality and supply.
Spindle	ABM, Spinder, Company M	Manufactured in Japan, Germany or assembled in Taiwan with key components procured from abroad, with stable quality and supply.
Ballscrew	NSK, THK, Hiwin	Stable quality and supply.
Linear guide	NSK, THK, Hiwin, DS	Stable quality and supply.
Metal Sheet	Chung Inn, Keyarrow, Yifong, Fongei	Made in Taiwan, with stable quality and supply.

- (4) The names of customers that accounted for 10% or more of total purchases or sales in any of the two most recent years, the amount and percentage of purchases or sales, and the reasons for any changes.
  - 1. Information on suppliers that accounted for 10% or more of total annual net purchases in any of the past two years:

Unit: NT\$ thousand; %

# 4. Environmental Expenditure Information

Information on Environmental Safety and Health:

- (1) Environmental safety and health performance
  - 1. Dajia plant, the operating headquarter, was certified in 2015 for ISO 14001: 2015 environmental management system, and has been certified periodically with the latest certification valid until December 11, 2026.
  - 2. Dajia plant, the operating headquarter, was certified in 2015 by ISO 90001: 2015 quality management system and has been certified periodically with the latest certification will be valid until December 11, 2026.
  - 3. Dajia plant, the operating headquarter, was hazard-free in 2024 (361,528 cumulative hours without incapacitating injuries).
  - 4. Dajia plant, the operating headquarter, obtained ISO 14064-1:2018 in 2022, as well as an external certification of GHG emissions information for the year 2021.
  - 5. Dajia plant, the operating headquarter, obtained ISO 14064-1:2018 in 2023, as well as an external certification of GHG emissions information for the year 2022.
  - 6. Dajia plant, the operating headquarter, obtained ISO 14064-1:2018 in 2024, as well as an external certification of GHG emissions information for the year 2023.
  - 7. Winbro's U.S. plant was certified ISO 3485: 2016 medical device quality management system in 2023, with the latest certification valid until August 23, 2026.
  - 8. Winbro's U.S. plant was certified through the NADCAP non-conventional processing certification in 2023 and has been certified periodically, with the latest certification valid until May 31, 2025.
- (2) Water resources and wastewater management
  - 1. Dajia's plant is equipped with wastewater treatment facilities, which discharges the treated wastewater to the sewers in the industrial area after meeting the discharge standard.
  - 2. The Company has applied for permits for water pollution prevention measures in accordance with the law, and appoints accredited testing institutions by the Ministry of Environment to conduct monthly inspections of wastewater discharges at the plant in order to effectively monitor the quality of discharges on a regular basis. The wastewater discharges in 2024 were in compliance with the standards.
  - 3. Regular drills are conducted annually in accordance with the wastewater treatment procedures to minimize the impact caused by wastewater treatment anomalies on

the environment.

# (3) Waste management

The Company's wastes mainly consist of domestic garbage and general production wastes, which are disposed of by means of recycling and reuse, direct disposal (incineration and landfill), and outsourced removal services. In 2024, the Company recycled 27.6 metric tons of scrap metal and 19.1 metric tons of paper waste.

# (4) Energy management and reduction

The Company conducts annual GHG inventories and has obtained verification statements from the Precision Machinery Research and Development Center for the years 2021 to 2023. The 2024 GHG inventory was conducted through self-verification. GHG emissions:

The Company's inventory covered the Dajia site and the information on GHG

emissions for each year is as follows:

Emissions (metric tons)	2022	2023	2024 (Self-conducted inventory)
Scope 1	126.70	128.78	124.47
Scope 2	801.60	735.17	735.17
Total	928.30	863.95	859.64

Annual inventories will be conducted on an ongoing basis to facilitate the establishment of reduction goals and strategies.

Total amount of losses (including compensation) and penalties incurred as a result of environmental pollution, as well as future countermeasures (including improvement measures) and possible expenditures (including the estimated amount of losses, penalties and compensation that may occur if no countermeasures are taken, and if it is not possible to reasonably estimate the amount of losses, penalties and compensation, an explanation should be provided as to why it is not possible to reasonably estimate such amounts): Nil.

# 5. Labor Relations

- (1) List out the Company's various employee welfare measures, continuing education, training, and retirement systems and their implementation, as well as the agreements between labor and management and various measures to protect the rights and interests of employees.
  - 1. Various employee welfare measures and their implementation

The Company regards its employees as important assets. In order to pursue the sustainable operation of the Company, the Company has always been committed to the harmony between employers and employees and emphasizes on the welfare of the employees, and has established various generous employee welfare measures to promote the loyalty of the employees and achieve mutual existence and prosperity between the Company and the employees. Ever since the establishment of the Company, we have been regarding our employees as the greatest asset of the Company. Through a fair and open recruitment strategy, we have been implementing the spirit of the Gender Equality Act, whereby all employees are treated equally regardless of gender, religion, race, or political party, respecting all talents, employing people with physical and mental disabilities, and optimizing the sustainable development of the Company, as well as collaborating with various universities and colleges in organizing industry-academia collaborations and corporate visits to recruit talents from various sources. The comprehensive welfare system provided by the Company is as follows:

	Welfare measures	Implementation status	
Insurance/medical coverage		The Company has taken out labor insurance and	
		national health insurance in accordance with the	

Welfare measures	Implementation status
	law, so that each employee is adequately covered. In addition, we have increased the coverage of
	group insurance for employees and travel insurance for business travelers. The total expenses for 2024 were NT\$315 thousand.
Marriage and funeral subsidies	In order to improve the welfare of employees, the Company provides wedding gifts and condolence payments for the loss of family members, with five recipients in the year 2024.
Festival and birthday gifts	A total of NT\$1.698 million was granted in 2024 for festival and birthday gifts.
Maternity, hospitalization and home purchase subsidies	A total of 7 people claimed maternity and hospitalization subsidies in 2024.
Employee bonus	The Company, in case of profitability, will appropriate no less than 5.52% as employee compensation to allow both employees and employers in sharing the business results. A total of NT\$15.88 million was allocated in 2024.
Parental leave without pay	No employees applied for parental leave without pay in 2024.
Domestic and overseas travel subsidy	The amount subsidized for domestic and overseas travel was NT\$ 1.6 million in 2024.
Paid volunteer leave	A total of 308 instances of paid volunteer leave were applied for in 2024, amounting to 1,832 hours.
Employee stock ownership trusts	The Company implements profit-sharing by providing incentives equal to the amount of employee deposits, and a total of NT\$1.534 million was appropriated in 2024 as incentives.
Long service bonus for employees	In recognition of the long-term contributions of employees who have completed a certain number of years of service, a total of NT\$350 thousand of long service bonus was granted in 2024.
Employee canteen	The Company provides free Chinese food and free dinner for those who work overtime.
Others	Employee uniforms, employee parking, sports tournament prizes, and dinner party subsidies.

# 2. Employees' continuing education and training

The Company provides training for new employees to facilitate their understanding of the Company's product positioning and future development, and to assist them in starting their careers as soon as possible. For on-the-job training, each department arranges external or internal education and training courses on a regular or irregular basis in accordance with actual needs to enhance the professional skills of employees.

In terms of management talent cultivation, we have established a learning system in accordance with the functional development of each level of supervisors. In terms of succession planning for key management personnel, we also conduct regular talent readiness inventories and prepare individual development plans in accordance with the strengths and weaknesses of these personnel, which include online courses, project assignments, strategic rotations, and group function exercises, as well as regular English language courses in line with the globalization of the Group's business that require our management executives to improve their English language proficiency. In 2024, a total of 7 managers participated in 143 hours of English courses.

For employees who wish to continue their education in obtaining degrees or licenses, we offer a subsidy program to encourage them to pursue continuing education and maintain their competitive edge.

#### 3. Retirement system and its implementation

In order to fulfill the needs of our employees after retirement, the Company has

established the following labor retirement plans in accordance with the law.

- (1) Labor pension fund (the old fund)
  In accordance with the Labor Standards Act, a monthly pension fund of 4% of the total salary cost should be appropriated and deposited in the Bank of Taiwan to protect the rights and interests of laborers. The accumulated amount has reached NT\$47,567 thousand by the end of 2024.
- (2) Labor pension fund (the new fund)
  On July 1, 2005, the Company has started the parallel adoption of the Labor Pension Act, under which 6% of the employee's monthly salary should be contributed to the employee's individual pension account according to the employee's insurance coverage; for those who choose to make voluntary contributions to the pension fund, the amount will be deducted from the employee's monthly salary to the employee's individual pension account in the Bureau of Labor Insurance based on the rate of voluntary contributions. The Company's contribution to the new pension fund for 2024 was approximately NT\$6,968 thousand.

The Company's applicable provisions of the Labor Pension Act are as follows:

- (1) Voluntary retirement: A worker may apply for voluntary retirement under any of the following conditions: (For those who opt to adopt the Labor Pension Act, the same regulations shall apply)
  - (a) Where the worker attains the age of fifty-five and has worked for fifteen years.
  - (b) Where the worker has worked for more than twenty-five years.
  - (c) Where the worker attains the age of sixty and has worked for ten years.
- (2) Forced retirement: An employer shall not force a worker to retire unless any of the following situations has occurred:
  - (a) Where the worker attains the age of sixty-five.
  - (b) Where the worker is unable to perform his/ her duties due to disability. The Company may request the central competent authority to adjust the age prescribed in Subparagraph 1 of the preceding paragraph if the specific job entails risk, requires substantial physical strength or otherwise of a special nature; provided, however, that the age shall not be reduced below fifty-five.

Mr. Chuang Yung-Huang, Deputy General Manager of the Company, completed 25 years of service on February 28, 2025, and has officially applied for retirement. In the spirit of caring for employees, the Company has provided retirement benefits that are more favorable than those stipulated under the Labor Standards Act, ensuring his well-being after retirement.

- 4. Labor-management agreements and measures to protect employees' rights and interests The Company is people-oriented and values the well-being of its employees. Regular labor-management meetings are held for two-way communication to facilitate labor-management relations, improve labor conditions, and promote employee welfare, etc. To date, the Company's labor-management relations have been harmonious and there have been no disputes between employees and employers.
  - The Company has established related human resources management rules to ensure that employees are aware of their rights and should comply with the code of conduct. In addition, the Company has also established a Human Resource Review Committee to which employees may address any concerns about their rights and interests.
- 5. Code of conduct or ethical behavior of employees
  In order to clarify regulations governing the rights and obligations of employers and employees, and to maintain the workplace's order of employment, "Work Rules" have been

established in accordance with the law, and have been approved by the competent authorities and publicly disclosed, so as to ensure that the management of the Company's employees. The Work Rules clearly stipulate the appointment and reassignment of employees, working hours, salaries, discipline, rewards and penalties, dismissal, severance with pay, retirement, training, appraisal, and welfare measures. The Company has always been committed to integrity, transparency and accountability in its business activities. In order to fulfill the Company's business philosophy and core values, we have established the "Ethical Management Best Practice Principles" to guide our directors, managers and all employees to act in accordance with ethical standards, to comply with all laws and regulations, and strictly prohibits the offer or acceptance of bribes and the offer or acceptance of improper advantages. We are committed to upholding the principle of honesty and integrity, preventing conflicts of interest, and preventing opportunities for self-gain.

- 6. Employee safety and workplace protection measures and their implementation Regarding the management and supervision of employee safety and health, the Occupational Safety and Health Management Unit is responsible for preventing occupational hazards and ensuring the safety of the work environment for employees through the following protective measures:
  - (1) Adhere to the Occupational Safety and Health Management Policy and emphasize on safety records and healthy environment, provide safe and healthy working conditions and operating environment for employees and those who may be affected, and prevent injuries and health impacts that may be caused by the works.
  - (2) Conduct safety and health education and training for new recruits and existing employees in accordance with the Occupational Safety and Health Act.
  - (3) Eliminate hazards and reduce occupational safety and health risks, and conduct risk assessments on safety, health, and environment in accordance with the requirements of the Occupational Safety and Health Management System, so as to provide employees with a safe and healthy working environment, as well as to carry out health management and health promotion for employees.
  - (4) Security guards are stationed in the work area to safeguard the company's property and personnel.
  - (5) Provide free health checkups for employees, and set up a medical room and health care personnel to provide assistance to employees in health promotion and health management.
  - (6) Provide regular training to employees on firefighting, first aid, and evacuation in accordance with the Fire Services Act and its enforcement rules.
- (2) Losses incurred as a result of labor disputes for the most recent year and up to the publication date of the annual report, as well as disclosure on the estimated amount and measures to be taken to deal with such losses that may be incurred in the present and in the future, and, if they are not able to be reasonably estimated, the reasons for such inability to be reasonably estimated: Nil.

#### 6. Information Security Management

Information security management is regarded as one of the most important risks in the management and governance of the Company. In order to fulfill its responsibility of information protection to customers, suppliers and employees, the Company has established various information security systems and tools to achieve this goal. By the end of 2023, the Company has appointed an information security supervisor and a dedicated staff to constantly promote the goals and policies of information security.

(1) Information security risk management framework:

The Company's information security supervisor and dedicated personnel are responsible for the planning, execution, and promotion of information security management issues, promoting information security awareness, with senior executives participating in the supervision and reporting the status of information security management to the Chairman from time to time, as well as incorporating information-related regulations into the control and management rules and regulations, with the Board of Directors as the decision-making level. The Audit Office conducts regular annual reviews to ensure the confidentiality, integrity, availability, and legality of information assets. If deficiencies are found, the unit in question should be required to propose an improvement plan and report it to the Board of Directors, and the effectiveness of such improvement should be tracked on a regular basis in order to lower internal information security risks.

#### (2) Information security policies:

- 1. Ensure the continuous operation of all information systems
- 2. Protect against hackers and viruses
- 3. Prevent wrongful and unlawful use with intent
- 4. Prevent sensitive data leakage
- 5. Prevent man-made errors and accidents
- 6. Maintain the safety of the physical environment

#### (3) Management plans for information security

- 1. Security management of computing equipment
  - (1) The Company's system servers are located in a dedicated server room, and access to the server room is controlled and recorded.
  - (2) Independent air-conditioning is provided inside the server room to keep the system servers operating in a proper temperature environment, and chemical fire extinguishers are installed, which can be used for common fires or fires caused by electrical appliances.
  - (3) In order to prevent the system from crashing due to unexpected power outages, or temporary power outages that will not interrupt the operation of computer applications, the server room is equipped with uninterruptible power supply and voltage stabilizing equipment, and power outage simulation drills and tests are performed regularly to ensure the proper functioning of the equipment.

#### 2. Network safety management

- (1) The connection to the external network is equipped with an enterprise-grade firewall to block hackers' unauthorized access and to prevent internal bandwidth resources from being exploited.
- (2) Remote access to the Company's intranet is conducted by means of a VPN encrypted connection, and a VPN account must be applied for through the Company's internal system authority application procedure before being allowed to log in and access to the system, and logs will be kept for tracking and auditing purposes.
- (3) The internet behavior management and filtering devices are configured to control internet access, blocking access to harmful or impermissible network addresses and content, preventing the inappropriate leakage of sensitive data, and strengthening network security.
- (4) Implement physical network traffic control to separate the network lines used by guests and employees, and set up IPMAC control to prevent non-company

devices from connecting to the company's network.

#### 3. Virus protection and management

- (1) Endpoint protection software is installed on servers and employee computers. The virus logics are automatically updated to ensure that the latest viruses are being blocked, and potentially threatening system executables are detectable and prevented from being installed, with automatic scans being performed on a regular basis at fixed times of the week.
- (2) The email server is equipped with Anti-Spam and Anti-Virus dual protection filtering mechanism to block viruses, spam and suspicious emails.

#### 4. System access control

- (1) Employees are required to apply for system authority through the Company's internal procedures, and after approval by the supervisor, the information staff will create system accounts and authorize them according to the authority applied for by the system administrators before they are allowed to access the system applications.
- (2) Passwords for accounts are required to be of appropriate strength, number of characters, and a mixture of alphanumeric characters and special symbols before they can be approved.
- (3) Upon resignation (leave) of an employee, the information staff shall delete his/her system account as notified by the human resources department.

#### 5. Ensure the continuity of the system

- (1) System backup: A backup system is set up with a daily backup mechanism and an alternate storage area for each backup data to ensure the security of the system and data.
- (2) Disaster recovery drills: Regularly implement backup recovery drills to verify that the data recovered matches the point in time to ensure the accuracy and validity of the backup data.
- (3) Establish information security verification items and execute them on a regular basis to maintain the effective operation of the information security management system and the implementation of control procedures.

#### 6. Information security promotion and training

- (1) Reminders: Regularly issue reminders to employees to change system passwords with a certain level of complexity in order to safeguard their accounts.
- (2) Information security promotion: Information security news and important events are published monthly to raise employees' awareness of information security.

#### (4) Investing in software and hardware for security management

- Regularly evaluate and update information security related equipment and systems, with automated information security monitoring and notification mechanisms, and have dedicated personnel to handle immediate backup to achieve emergency blocking and preventive measures.
- 2. Perform whole-network vulnerability scans and information security framework fortification.
  - (1) The Company commissioned an external professional security service provider to conduct a vulnerability scan of its internal network in August.

- (2) Based on the results of vulnerability scanning, the information staff conducted network security enhancement and evaluated the acquisition of additional software, hardware and equipment to fortify the protection.
- 3. Employee training and promotion
  - (1) Monthly information security news and important events are selected and published on the information security bulletin to promote information security throughout the Company.
  - (2) Information security education training for staff was completed in mid-November.
- 4. Social engineering drill

In order to raise employees' awareness of the awareness of risky emails, a simulated malicious email drill was completed in November to raise the awareness of the tested employees regarding information security.

(5) Losses, potential impacts, and countermeasures resulting from significant information security incidents for the most recent year and up to the date of the annual report, and if they are not able to be reasonably estimated, the reasons for such inability to be reasonably estimated: Nil.

7. Important Contracts

Contract Type	Counterparty	Contract Start and Ending Dates	Main Contents	Terms and Conditions
Technological collaboration	Company M (Japan)	Effective from February 28, 2012, the counterparty should be notified three months prior to the termination of the contract.	OEM collaboration	Confidentiality
Technological collaboration	Company M (Sweden)	Effective from October 2022, the counterparty should be notified six months prior to the termination of the contract.	OEM collaboration	Confidentiality
Borrowing contract	Bank groups such as Taishin International Bank and other syndicate lenders	Loan amount of NT\$1,290,000,000 with a term of five years from the initial utilization date.	Syndicate loan	Restriction on solvency

#### V. Review and Analysis of Financial Status and Business Results and Risk Issues

1. Financial Status: The Main Causes and Impacts of Significant Changes in Assets, Liabilities, and Equity for the Last Two Years, and Future Plans to Address Such Significant Impacts.

Unit: NT\$ thousand

Year			Difference		
Item	2023	2024	Amount	%	
Current assets	2,674,709	3,077,125	402,416	15.0	
Investments accounted for using equity method	34,542	30,868	(3,674)	(10.6)	
Property, plant and equipment	427,899	442,547	14,648	3.4	
Right-of-use assets	126,048	114,695	(11,353)	(9.0)	
Intangible assets	463,403	468,828	5,425	1.2	
Other assets	104,660	105,188	528	0.5	
Total assets	3,831,261	4,239,251	407,990	10.6	
Current liabilities	1,320,984	1,842,468	521,484	39.5	
Non-current liabilities	1,089,977	715,307	(374,670)	(34.4)	
Total liabilities	2,410,961	2,557,775	146,814	6.1	
Capital stock	549,500	549,500	_	_	
Capital reserve	820,363	820,363	_	_	
Retained earnings	35,351	222,491	187,140	529.4	
Other equity	15,086	89,122	74,036	490.8	
Total equity	1,420,300	1,681,476	261,176	18.4	

<sup>1.</sup> Analysis and description (for the changes of 20% or more, and the changes with an amount of NT\$10 million or more):

<sup>(1)</sup> The increase in current liabilities and the decrease in non-current liabilities were mainly due to the reclassification of long-term borrowings maturing within one year.

<sup>(2)</sup> The increase in retained earnings was due to the result of net income from operations for the period.

<sup>(3)</sup> The increase in other equity was due to the recognition of exchange differences on the conversion of the financial statements of foreign operators.

<sup>2.</sup> Future response plan: The above changes have had no material impact on the Company's finance and operating position.

- 2. Financial Performance: Main reasons for significant changes in operating income, net operating profit and pre-tax net profit in the last two years, sales forecast and the basis, and possible impact on the Company's future financial status and the response plan:
- (1) Financial performance comparison and analysis

Unit: NT\$ thousand

Year	2022	2024	Difference		
Item	2023	2024	Amount	%	
Operating revenue	2,770,750	3,240,019	469,269	16.9	
Gross profit	776,670	1,032,264	255,594	32.9	
Operating income	209,088	339,854	130,766	62.5	
Non-operating income	(24,498)	(22,593)	1,905	(7.8)	
and expenses					
Profit before income tax	184,590	317,261	132,671	71.9	
Income tax expense	73,597	104,669	31,072	42.2	
Profit for the period	110,993	212,592	101,599	91.5	
Other comprehensive	26,455	77,927	51,472	194.6	
income for the period,					
net of tax					
Total comprehensive	137,448	290,519	153,071	111.4	
income (loss)					

- 1. Analysis and description (for the change of 20% or more, and the amount of change of NT\$10 million or more):
  - (1) The increase in gross profit was primarily due to higher capacity utilization and successful process optimization.
  - (2) The increases in operating profit, profit before tax, and net profit were mainly attributable to the rise in gross profit during the period.
  - (3) The increase in income tax expenses was primarily due to higher profitability.
  - (4) The increase in other comprehensive income (loss) and total comprehensive income (loss) were mainly due to the impact of differences in the conversion of financial statements of foreign operators.
- 2. Future response plan: To optimize the global layout strategy, to actively expand the market, to focus on strategic, high-tech and sustainable high-growth markets and to invest in the development of highly-automated and intelligent smart machinery and equipment, to enhance profitability, and to continue to implement rolling foreign exchange to address the unfavorable factors arising from fluctuations in the international exchange rate.
- (2) Expected sales volume and its basis, potential impact on the Company's future finance and operation, and the response plan:
  - 1. Expected sales volume and its basis: Based on the market information collected by the business department and the sales forecast provided by the distributors, the annual sales target will be set upon compilation and evaluation.
  - 2. Potential impact on the Company's future finance and operation: No material impact on the Company's future finance and operation.
  - 3. Response plan: The Company will continue to actively engage in the research and development of manufacturing process technology and to collaborate with renowned universities and research institutes to acquire technology transfer and the latest product information, so as to enable the Company's products to remain in a leading position in the market at the technological level.

- **3.** Cash Flow: Analysis of changes in cash flow for the most recent year, improvement plan for the liquidity shortfall, and analysis of cash liquidity for the coming year.
- (1) Analysis and description of changes in cash flow in recent years

Unit: NT\$ thousand

Year	2023	2024	Difference		
Item	2023	2024	Amount	%	
Net cash flows from (used in) operating activities	115,652	40,398	(75,254)	(65.1)	
Net cash flows from (used in) investing activities	(75,313)	(225,739)	(150,426)	199.7	
Net cash flows from (used in) financing activities	(129,461)	142,448	271,909	(210.0)	

Analysis of changes in the percentage of increase/decrease of 20% or more:

- 1. The net cash inflow from operating activities decreased, mainly due to increased inventory purchases in response to order demand during the year.
- 2. The net cash outflow from investing activities increased, primarily due to higher amounts of loans to related parties and acquisitions of property, plant, and equipment.
- 3. The net cash inflow from financing activities increased, mainly because of a reduction in bank loan repayments during the year.
- (2) Response plane for liquidity shortfall: The Company will utilize bank borrowings to meet its future capital needs, therefore, there is still no risk in cash liquidity.
- (3) Analysis of cash flow in the coming year:

Unit: NT\$ thousand

Beginnin	Estimated net cash	Estimated net cash	Estimated net cash	Cash	Remedies for deficit of estimated cash	
g cash balance (1)	flows from (used in) operating activities (2)	flows from (used in) investing activities (3)	flows from (used in) financing activities (4)	surplus (Deficit) forecast (1+2+3+4)	Investmen t plan	Financing plan
810,330	200,000	(300,000)	100,000	810,330	_	_

#### Description:

- 1. The net cash inflow from operations of NT\$200,000 thousand was mainly due to the sales of machines and after-sales services.
- 2. The net cash outflow of NT\$300,000 thousand from investments was mainly due to capital expenditures for acquisitions and plans to expand into the European market.
- 3. The net cash inflow from fund-raising was NT\$100,000 thousand, which was mainly due to bank borrowings.
- 4. Impact of Major Capital Expenditure in the Past Year on the Financial Status: There were no significant capital expenditures in recent years.

### 6. Analysis and Assessment of Risk Issues in the Past Year and as of the Date of Publication of the Annual Report:

- (1) Impact of changes in interest rates, foreign exchange rates, and inflation on the Company's profit or loss and future countermeasures:
  - 1. Changes in interest rates:

The Group's interest expenses in 2023 and 2024 amounted to NT\$32,327 thousand and NT\$31,505 thousand, respectively, which accounted for 1.17% and 0.97% of the net operating income for the period. With the inflationary pressure and major economies' currency policies, as reflected in the interest rate in 2024, the Company utilized low-interest rate financing instruments to maintain low financing costs.

2. Changes in foreign exchange rates:

The Group's exchange gain for 2023 and 2024 amounted to NT\$673 thousand and NT\$24,108 thousand, respectively, which accounted for 0.02% and 0.74% of the Group's net operating income for the period. Given that the Group focuses on export sales, changes in foreign exchange rates tend to affect the Group to a certain extent. In order to cope with the risk of exchange rate fluctuations, the Group intends to adopt the following countermeasures:

- (1) Rolling conversion of foreign currency vault to lower the risk of foreign exchange fluctuation.
- (2) Increase the utilization of derivatives (including forward contracts, foreign exchange swaps, interest rate swaps, and other contracts) to reduce the exchange rate risk that may arise from future collections.
- (3) Establish internal control system and implement it on an on-going basis.
- 3. Inflation:

With the increase in prices of raw materials by some suppliers since 2023, the Group has adjusted the selling prices of some of its products in a timely manner and has been exploring alternative suppliers and alternative raw materials to minimize the impact of inflation. The Group will continue to maintain good relationships with its suppliers and customers, keep track of the global economic trend, and make timely adjustments to its procurement and sales strategies in order to cope with the impact of inflation, and the same applies to 2024.

- (2) Policies for engagement in high-risk, highly leveraged investments, lending of funds to others, endorsements and guarantees, and derivatives transactions, main reasons for profits or losses, and future countermeasures:
  - 1. The Group's financial policy is based on a steady and conservative principle and the Group does not engage in high-risk and highly leveraged investments.
  - 2. All of the Group's lending funds to others are subsidiaries within the consolidated /individual financial statements and have been processed in accordance with the "Procedures for Lending Funds to Others" and in compliance with the relevant laws and regulations.
  - 3. The Group has not engaged in endorsement and guarantee for the most recent year and up to the publication date of the annual report. Should the Group decide to engage in endorsement and guarantee in the future, it will be processed in accordance with the "Procedures for Endorsement and Guarantee" stipulated by the Group and relevant laws and regulations.

4. The Group's derivative transactions are processed in accordance with the "Procedures for Engaging in Derivative Transactions" established by the Group. The main purpose of engaging in derivative transactions is to hedge the risks associated with exchange rate fluctuations, and to plan for appropriate amount of foreign exchange vaults and flows taking into account the actual amount of foreign exchange generated by the Company's operations. These instruments are not high-risk, highly leveraged products, and do not pose any material negative impact on the Group's financial position and profitability. The unrealized gains (losses) on financial instruments arising from the Group's forward exchange/swap/interest swap contracts for the years ended 2023 and 2024 were both NT\$0 thousand. As of the publication date of the annual report, the Group has not entered into any derivative contracts with financial institutions.

#### (3) Future R&D plans and estimated R&D expenses:

#### 1. Future R&D plans

Since its founding, the Group has focused on developing and designing machines based on the demands of the European market. In recent years, the Group has actively expanded into the U.S. and Asian markets, developing a universal platform to ensure scalability and upgradability across different product lines. By integrating software (AI control systems) and hardware (high-rigidity structures) for synchronized upgrades, the Group has enhanced its overall market competitiveness.

New cutting-edge machining technologies serve as the foundation for new product planning, building a core brand image centered on "High Precision, Green Manufacturing, and Smart Innovation," aimed at attracting a broad range of customer segments.

The Group manufactures CNC vertical, horizontal, and five-axis machining centers and has been actively advancing towards Industry 4.0 smart manufacturing in recent years. Key initiatives include digitalizing production management, implementing automation, upgrading intelligence, and enhancing after-sales service platforms. Through the use of big data management, the Group can quickly respond to operational needs and manufacturing processes, positioning Quaser as a pioneer in the smart machinery sector and a benchmark in high-end five-axis machining centers.

#### (1) Modular Flexible Machine:

Users can freely assemble different modules according to their needs, supporting upgrades from 3-axis to 5-axis configurations. Featuring a high-rigidity, compact design, it reduces the footprint by 40%. Equipped with an easy-to-use interface, it lowers the operational threshold and offers a cost-effective solution to help small and medium-sized enterprises quickly enter the precision machining sector.

#### (2) High-performance five-axis machining centers:

Our innovative five-axis machining centers production lines continue to develop in collaboration with European manufacturers, developing a full range of products, adopting a unique modular structure, with unique structural composition, the use of downward chip removal and high spatial combination of flexibility and other characteristics, five-axis parallel machining, imported high-precision and high-specification B/C axes, operators are able to work with short distances from the main spindle and workpieces, as well as better applications of aerospace processing, providing excellent ergonomic design, and fulfilling the future needs of the aerospace industry milling machining center demand.

#### (3) Ultra-Rigid Precision Machine:

Utilizing high-strength materials and computer-aided topology optimization, the machine achieves a 20% weight reduction while maintaining exceptional rigidity. Cutting capability and machining stability are improved by 50%. The structure adapts to various operating environments, responding in real time to load changes to ensure consistent precision. It supports high-difficulty machining, such as titanium alloys and carbon fiber materials, meeting the demands of high-end customers and addressing the needs of the aerospace, semiconductor equipment, and high-precision mold manufacturing markets.

#### (4) Carbon-Neutral Smart Machine:

#### A. Energy-Saving Operation Mode:

Incorporates intelligent energy-saving modes, reducing standby power consumption by 50% and operational energy usage by 30%.

B. Full Lifecycle Carbon Footprint Tracking:

Tracks carbon emissions data in real time throughout the machine's operational lifecycle, helping customers achieve carbon neutrality goals and comply with ESG standards. This enhances brand image in the green manufacturing sector, with sustainable manufacturing enterprises as the target market.

(5) Smart optimized user interface:

For a variety of complex works, the Company has researched and developed the user interface necessary for such operations; taking into account the convenience and unique features, the Company's unique products offer a multiplying effect and satisfy the needs of specialized customers; including motion controls, real time displays, scheduling, repair and maintenance, and so on. All these features enable us to satisfy customers in the market with a variety of automation, multi-tasking, inspection, and other machining center functions.

(6) New generation horizontal machining centers:

In response to the product evolution at the customer's end, we are moving towards a new horizontal machining layout to improve the machining efficiency. Equipped with multi-axis machining capability, including three, four and five-axis, providing more flexible machining options to meet the needs of multi-face cutting of complex workpieces. Integration of advanced numerical control system and smart technology provides an intuitive user interface, which facilitates the operator in operating and monitoring the machine. The machines are applicable to a variety of industries, including aerospace, automotive, and semiconductor equipment components, and are designed to meet the needs of different industries for efficient and high-precision machining.

- 2. The Group invested NT\$77,771 thousand and NT\$133,193 thousand on R&D in 2023 and 2024, accounting for 2.81% and 4.11% of the Group's turnover, respectively. In the future, the Group will continue to invest a considerable amount of R&D expenditures in automation, intelligence, and high-and low-end five-axis machining centers in order to enhance the competitiveness of the Group.
- (4) Impact of changes in domestic and overseas policies and laws on the Company's financial operations and the countermeasures:

In addition to operating in compliance with relevant domestic and overseas laws and regulations, the Group also pays close attention to the development trend of domestic and foreign policies and regulations in order to better understand the changes in the market environment. There have been no significant impacts on the Group's financial operations as a result of significant domestic and overseas policy and legal changes in the recent years and up to the date of publication of the annual report of the Company.

(5) The impact of technological changes (including information security risks) and industry changes on the Company's financial operations and the countermeasures:

In the postpandemic era, manufacturers are facing the issue of labor shortage and rising wages in the general environment, and in response, manufacturers are required to adapt to the situation by changing materials, manufacturing processes, and production methods. The Company has developed smart automation to cope with the labor shortage and the demand for local manufacturing; due to the rapid decline in the aviation industry during the pandemic period, which had a significant impact on the Company, we have continued to build our R&D capabilities and invested in the development of different industries in order to diversify our risks, such as semiconductors, hydrogen fuel cells, and medical-related industrial chains, not only fulfilling the global carbon reduction policy, but also minimizing the impact of changes in the industry on the Company's financial and business operations.

(6) The impact of corporate image change on corporate crisis management and the countermeasures:

Since its establishment, the Group has been building up a good corporate brand and image with its quality, service and efficiency. In the future, the Group will continue to devote itself to the functional training and development of employees so as to enable them to create high standards of productivity and subsequent efficiencies. Until now, the Group has not experienced any significant impact due to the change in corporate image.

(7) Expected benefits, possible risks and countermeasures associated with merger and acquisition:

Mergers and acquisitions will continue to be part of the Company's future development plans.

However, as of the date of publication of the annual report, the Company has yet to have any merger and acquisition goals and plans, and will continue to cautiously assess the risks and benefits in order to maximize the Company's interests and protect shareholders' rights and interests.

(8) Expected benefits, possible risks and countermeasures associated with plant expansion:

In order to meet the production capacity requirements for the Company's medium and long-term operational growth and to improve the quality of raw materials, the Group plans to set up a processing plant in its medium and long-term operational development plan. The new facility will not only accept customer orders for parts processing but also manufacture key components in-house to ensure stable machine delivery schedules and consistent quality. As of the publication date of the annual report, when the Company has specific plans in the future, the Company will carefully evaluate the investment benefits and possible risks to ensure the development of the Company and the interests of shareholders.

- (9) Risks and countermeasures associated with the over-reliance of procurement or sales of a certain source/target:
  - 1.Except for the Group's sales to Company G and Company R, which accounted for 16.22% and 11.85% of the Group's sales in 2024, the Group's sales to a single customer did not exceed 10%, and therefore the Group is unlikely to be exposed to the risk of sales concentration.
  - 2. The Group's major raw materials for its products are controllers, castings, transmission mechanisms and sheet metal, etc. The Group maintains more than two suppliers for its key raw materials in order to minimize the risk of supply shortage. The Group has been collaborating with its major suppliers for many years and there has not been any supply shortage in the past. There was no such concentration of supply as no single supplier accounted for more than 10% of the Group's total procurement for the year 2024.
- (10) Impacts, risks on the Company due to substantial transfer or replacement of shareholdings of directors or major shareholders holding more than 10% of the Company's shares and the countermeasures:

The Company has not experienced any substantial transfer or replacement of shareholdings of directors or major shareholders holding more than 10% of the Company's shares in recent years and as of the publication date of the Company's annual report.

- (11) Impacts, risks and countermeasures associated with the change in ownership of the Company:
  - There were no changes in the Company's ownership in the most recent year and up to the publication date of the annual report.
- (12) If there is any litigation or non-litigation, please list the significant litigation, non-litigation or administrative litigation with its judgment already made or pending which is related to the Company or the Company's Directors, General Manager, actual person in charge, shareholders holding more than 10% of the Company's shares or affiliates. If the result may have a significant impact on the shareholders' equity or the price of the Company's shares, please disclose the fact of the dispute, the claim amount, the date of commencement of the litigation, the principal litigants and the handling of the situation as of the date of publication of the annual report: Nil.
- (13) Potential risks on information security and the countermeasures:

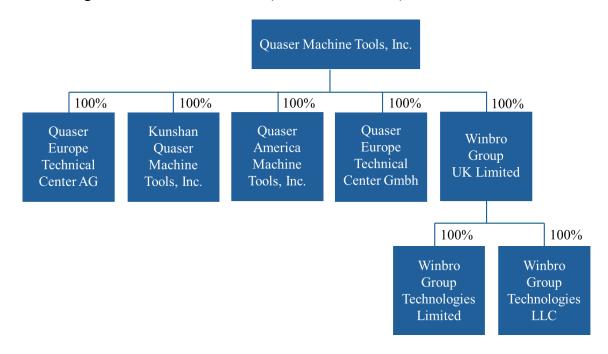

The Company has established information loop control and information security management rules in order to maintain the normal operation of information and computer systems in a secure environment. In addition to preventing unknown network attacks and malicious programs from crashing the system, we also promote common information security incidents or recent news from time to time to raise the awareness of information security among our employees. On work days, we perform external backups of important internal data such as ERPs, and we keep records of our employees' system authority control, system access, USB access, etc., and conduct checks from time to time. We also keep full records of e-mails, both incoming and outgoing, and strictly monitor the software installed on the computers to prevent the leakage of important internal information. The anti-virus software of personal computers is automatically updated at all times, and anti-virus software scanning will be triggered at each Thursday's noon to minimize the risk of virus infection in the computers.

7. Other Important Matters: Nil.

#### **Quaser Machine Tools, Inc.**

#### Statement on Internal Control

Date: March 11, 2025

The Company hereby releases this Statement concerning the results of self-inspection on the Company's internal control system made in 2024:

- The Company is fully aware that establishing, operating, and maintaining an
  internal control system are the responsibility of its Board of Directors and
  management. The Company has established such a system aimed at providing
  reasonable assurance of the achievement of objectives in the effectiveness and
  efficiency of operations (including profits, performance, and safeguard of asset
  security), the reliability of financial reporting, and compliance with applicable
  laws.
- 2. An internal control system has inherent limitations. No matter how perfectly designed, an effective internal control system can provide only reasonable assurance of accomplishing the three objectives mentioned above. Furthermore, the effectiveness of an internal control system may change along with changes in environment or circumstances. The internal control system of the Company contains self-monitoring mechanisms, however, and the Company takes corrective actions as soon as a deficiency is identified.
- 3. The Company judges the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing the Establishment of Internal Control Systems by Service Enterprises in Securities and Futures Markets (hereinbelow, the "Regulations"). The internal control system judgment criteria adopted by the Regulations divide internal control into five elements based on the process of management control: 1. control environment 2. risk assessment 3. control activities 4. information and communications 5. monitor. Each element further contains several items. Please refer to the Regulations for details.
- 4. The Company has assessed the design and operating effectiveness of its internal control system according to the aforesaid criteria.
- 5. Based on the findings of the assessment mentioned in the preceding paragraph, the Company believes that as of December 31, 2024, its internal control system (including its supervision and management of subsidiaries and its overall

#### Attachment 1

implementation of information security), encompassing internal controls for understanding the degree of achievement of operational effectiveness and efficiency objectives, the reliability, timeliness, and transparency of reporting, and compliance with applicable norms and applicable laws, regulations, and bylaws, is effectively designed and operating, and reasonably assures the achievement of the above-stated objectives.

- 6. This Statement will become a major part of the content of the Company's Annual Report and Prospectus and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Act.
- 7. This Statement has been passed by the Board of Directors Meeting of the Company held on March 11, 2025, where none of the 9 attending directors expressed dissenting opinions, and the remainder all affirmed the content of this Statement.
